POETICAL.

For the Register. HENRY CLAY. BY GEORGE W. CUTTER

Thou art not fallen, eagle one, As cloudless and as bright Thy starry name still glitters on In glory's solar height,
As when above the din of arms. Thy trumpet accents rose, A tocsin at whose wild alarms Thy countrymen arose; And rallying to each hill and plain, To every sea and shore: They won those victories o'er again, Their fathers won of yore.

Or when from out the Senate hall, Thy name a spell went forth, To bid the Southern banners fall

To calm the raging North
When gathered up thy mighty hand
The fragments of that chain. The union of this glorious land. And bound its links again. Thou art not fallen, faithful one,
Thy name is still sublime;
Not in thy native land alone,
But many a distant clime;

Where freedom struggles with her chains
In southern lands afar, A halo round thy memory reigns That rivals Bolivar. And in those memorable Isles,

Where liberty had birth;
Where still a sky of glory smiles,
O'er ever classic earth. Upon the breeze thy name hath flown, A tallisman of bliss. And mingles there with Marathon. Thermopylae, Salamis. Dear as the flag our sires unfurl'd, To wave o'er land and sea; Thy name is hail'd throughout the world, Thou guardian of the free.

Thou art not fallen, glorious one. And now the struggles o'er; Kentucky hail's her noble son, As proudly as before.

And joys to know that even now, When slander's worst is done, They could not tear from off thy brow, The wreathes already won.

The petty power by party lent, A nameless nominee, The empty title President, What could they add to thee; Go place new colours in the skies, Give each star another ray, Add to the rainbow fresher dyes, More light to the god of day, But deem not ye can ever mar, Or decorate a name, So long the bright and polar star,

Upon the sky of fame.

A bevy from beauty came over to peep; A bevy from manhood flocked into the bower-Ten years had the Cactus been soundly asleep, Ten years had been dreaming some plan for a flower.

Bright Phoebus had gone to his couch in the west, And Thetis had carefully covered him up; While there, round the Cactus gazed many a

guest,
To see what she had in her beautiful cup.

The bud slowly swelled and the petal peeped out, As clear as a chrystal, as white as the snow, To see whether danger were lurking about,
And whether, with safety, a Cactus could blow

That streamed from the brim of a challice of gold. At midnight that Cactus was out in full bloom She breathed forth her fragrance, her graces

she spread; But when golden Phæbus, next morning, had come, The petals were closed, and the flower-was

Oh! beauty, look here—'tis a mirror for thee—How quick from the bud is the death of thy Bloom;
Oh! come, see how lovely a picture can be, Where fairy-like Innocence goes to the tomb?

"I will get them," cried a gentle voice; it was that of the young girl, who had follow-ed them unperceived. She hurried out of the spect for you, and to remain your most humroom, and returned speedily; for she perceived that the slightest delay might be fatal. A woman followed her, bringing fire and wood, with which she lit a fire and then retired. The young messenger was loaded with a bottle of wine, a small loaf, and the wing of a fowl, wrapped in a piece of a newspaper. She placed the whole near the old man, and then, kneeling down, arranged the fire, and stirred it to a blaze.

As the latter was not introduced, no person took much notice of him, for each was too much occupied with the ceremony for which they had come together .-Madame Revial was still an invalid, and had her daughter seated near her. Jules Barsac was standing on the other side. The notary placed his portfolio on the table, and took from it a contract of marriage, which he proceeded to read aloud. After having specified the little property of the bridegroom, he went on to detail the fortune of the lady: 'Madame Revial makes over to her daughter the sum of 1,000% per year-'

Temperance Sermon.

There is much of argument and persuasion in the following short sermon, which is taken from the forthcoming Temperance Almanac for 1845, a work which ought to be in every temperance family:

"Why should the work cease?"-Neh.vi: 3. Consider three things.

It is a wast work.—It designs the reformation, y kindness, of every drunkard;—the prevention y total abstinance, of drunkenness in every soer man, woman, and child; drying up the great fountains of pauperism, crime, and premature death;—the removal of the greatest obstacle to the spread and reception of the gospel:-a universal preparation for good morals, and undefiled

account of the execution of an innocent man in Missouri:--

TRAGICAL FATE OF BURTON, IN MISSOURI. A young lady belonging to a genteel and very proud family in Missouri, but beloved by a young man named Burton; but unfortunately her affections were fixed on another, less worthy. He left her with a tarnished reputation. She was by nature energetic and high-spirited; her family were proud, and she lived in the midst of a society which considered revenge a virtue, and named it honor. Misled by this false popular sentiment, and her own excited feelings, she resolved to repay her lover's treachery with death. But she kept her secret so well that no one suspected her purpose, though she purchased pistols and practiced with them daily. Mr. Burton gave evidence of his strong attachment by renewing his altentions when the world looked most coldly upon her. His generous kindness won her bleeding heart, but the softening influence of love did not lead her to forego the dread ful purpose she had formed. She watched for a favorable opportunity and shot her betrayer when no one was near to witness the horrible

deed.
Some little incident excited the suspicion of Burton, and he induced her to confess to him the whole transaction. It was obvious enough that suspicion would naturally fasten upon him variance with the divine law, cumstantial evidence was fearfully against him.

She immediately published the whole history of her wrongs and her revenge. Her keen sense of wounded honor was in accordance with public sentiment; her wrongs excited indignaion and compassion, and the knowledge that an innocent and magnanimous man had been so brutally treated, excited a general revulsion of disc or a regiment of soldiers, with greater speed dreadful records of her memory.

From the Pittsburgh American. Remarkable Rock,

One of the most remarkable rocks of which we have any knowledge, has been lately discovered in the middle of that great inland sea, Lake Superior. By a gentleman who has recently re turned to this city from Cooper Harbor, we learn that a shaft of Trappe rock has very lately been discovered, rising in the Lake from 150 to 200 God now requires it. Does no not in his providence? Does he not say in his word? "Do good to all men as you have an opportunity."—
"To him that knoweth to do good and doeth it feet. What renders it most extraordinary, is that it stands alone, and all round it, so far a examinations have been made, no bottom has cause the work to cease—all opposers—all mod-erate drinkers—all venders of intoxicating on the lake, and the point of the rock itself does been reached by any one of the lend lines used not exceed an area of more than six or seven feet square, and so far as observations of it have extended, it does not appear to enlarge in size as it decends. It has already, he states, become a source of alarm to the mariners who navigate

the lake, who take special care in passing, to give it as wide a berth as possible. It is too too remote and dangerous to admit of a light, and therefore, its removal has become a matter of serious importance, and will doubtless pertain to the duty of the government. A single blast from a bore of sufficient depth would probably do it, but the surface of the rock being so near that of the water, and the space so narrow as to forbid any regular lodgment of workmen, they would have to be attended constantly by a vessel of sufficient size to restrain any sudden storm of the lake, and would also have to be kept constantly under way, as no harbor or even bottom for an onchorage is within a day's sail.

The discoverers relate that the rock appears to be a general resort for the Sammon Trout of those lakes, as they found them there in almost incalculable numbers, having, during their short stay, caught several barrels with no other instrument than a rod of iron, on one end of which they turned a hook. They tried with all their lines on board for soundings immediately around the rocks but without success. Such a vast column, could it be exposed to view would laugh into ridicule Cleopatra's needle, Pompey's pillar, the colossus of Rhodes or any production of ancient or modern art,

Good Fortune.

A young Yankee named Coleman, for a long ime, barely made a subsistence in Boston, by teaching people to play on the acordion. He afterwards patented a sort of lyre accordion, and inally added an "Æolian Attachment" to the mtent which excited much notice. This poor young fellow has suddenly sprang into affluence and fame! In New York \$100,000 has been agreed to be paid him for his improvement on the piano, and in London, where he is now, he has become the lion of the day, and it is said that he will receive half a million of dollars for his eloquent man all derive their sublime power from patent there, besides being petted by the nobil-ity of Great Britain.

Thick Shoes.—Talking of wet feet, as in the foregoing paragraphical item of our editorial meange of originality and selections, reminds us of the propriety of admonishing the ladies of our city to betake themselves to the use of thick shoes. We have been in annual habit, at or about this season of the year, of advising this resort, and we have the pleasure of knowing that many have attended to it with profit to themselves, as found in "footing up" the account current of their constitution with that count current of their constitution with that inexorable gentleman often denominated the "clerk of the weather." We "go in" for thick shoes as a preventive of the bad physical consequences of wet or damp feet, and the doctors must pardon our trespass on their premises, or it may be on their practice, if we advise the ladies once again to "go in" for them also—to go in literally, into the shoemaker's shops, or stores, and procure good, stout, thick, double-soled walking shoes, suitable for the present and approaching seasons. A Word to Young Men.

Wishing, and sighing, and imagining, and dreaming of greatness, said William Wirt, will never make you great. But cannot a young man command his energies? Read Foster on decission of character. That book will tell you what is in your server. what is in your power to accomplish. You must gird up your loins and go to work with all the in-domitable energy of Hannibal scaling the Alps. It is your duty to make the most of talents, time

and opportunities.

Alfred, king of England, though he performed more business than any one of his subjects, found time to study.

Franklin in the midst of all his labors found

time to drive into the depths of philosophy, and explored an untrodden path of science.
Frederick the great; with an Empire at his direction, in the midst war, and on the eve of battle, found time to revel in the charms of philosophy, and to feast himself on the luxuries of learning.

Bonaparte, with Europe at his disposal, with kings at his ante-chamber begging for vacant thrones, and at the head of thousands of men whose destinies were suspended on his arbitrary pleasure had time to converse with books.

And young men who are confined to labor or

business even twelve hours a day, may take an hour and a half of what is left, for study, and which will amount to two months in a year.

The Steam engine, in its present improved state, appears to be a thing almost endowed with intelligence. It regulates with perfect accuracy and uniformity, the number of its strokes in a given time, and, moreover, counts, or records them, to tell how much work it has done, as a lock records the beats of its pendlum. It regulates the supply of water to the boiler, the briskthe fire, and the quantity of steam admitted to work; oils its joints; takes out any air which may accidentally enter into parts where a perfect vacuum is required; and when any thing goes wrong which it cannot of itself rectify, it warns its attendants by ringing a bell.
Yet with all these talents, and even when possessing the power of 600 horses, it is obedient to the hand of a child. Its aliments is coal, wood or other combustibles; but it consumes none while idle! To Destroy Rats.

The following recipe for the destruction of rats, has been communicated by Dr. Ure to the council of the English Agricultural Society, and is highly recommended as the best known means of getting rid of these most obnoxious and destructive vermin. It has been tried by several ntelligent persons, and found perfectly effectu-

al; "Melt hog's lard in a bottle plunged in waster heated to about 150 ° Fabrenheit introduce into it an ounce of phosforous for every pound of lard, then add a pint of proof spirit or whiskey; cork the bottle firmly after its contents have been heated to 150° taking it at the same time out of the water-bath, and agitate smartly till the phosphorous becomes uniformly diffused, forming a milky-looking liquid. This mixture being cooled, with occasional agitation at first, will afford a white compound of phosphorous and lard, from which the spirit spontaneous y separates, and may be poured off to be used sgain, for none of it enters into the combination, but it merely serves to comminute the phosporous, and diffuse it in very fine particles through the lard. This fatty compound, on being warmed very gently, may be poured out into a mixture of wheat-flour and sugar incorporated therewith, and then flavored with oil of rhodium, or not, at pleasure. The flavor may be varied with oil of aniseed, &c., This dough being made into pellete is to be laid into lets, is to be laid into rat holes. By its luminousness in the dark, it attracts their notice, and being agreeable to their palates and noses, it is readily eaten and proves certainly fatal.— They soon are seen issuing from their lurking places to seek for water to quench their burning thirst and bowels. And they commonly die near the water. They continue to eat it as long as it is offered to them, without being deterred by the fate of their fellows, as it is known to be the case with arsenical doses. It may be an easy guide for those who are desirous of following Dr. Ure's prescription, and may not have a thermometer at hand, to know that a temperature of 150 ° of Fahrenbeit is equivolent to a degree of heat midway between that at which white of egg coagulates and white wax melts."

POLITICAL.

From the Philadelphia Chronicle. Our Policy Towards Foreigners.

We are frequently reminded of the fact, that during the American Revolution a number of foreigners enlisted in our cause, nobody shared the deprivations of that period, and distinguished themselves in the cause of liberty. Lafayette, a subject of the most absolute and most in our honored land is so wonderfully great left the sunny wine hills of his native France, as many have been led to think. The Louisville Courier, a neutral paper of coming out Native American, gives the folfowing as the ground work of principle which it will advocate.

AMERICAN REPUBLICAN PRINCIPLES. 1st. That the elective franchise should be

preserved pure, and uncorrupted.
2d. That the term of probation for the naturalization of all foreigners ought to be extended to twenty-one (21) years; and that the proceeding necessary to obtain certificates of naturalization, ought to be so ordered by law, as to prevent fraud and corruption therein.

3d. That we do not propose by legislation to divest foreigners of any rights already acquired under our existing laws, but that in our opinion the rights of citizenship to be extended thereafter, ought to be so qualified as to deny to their recipients the privilege of holding any office of trust or profit under

this government.
4th. That all men have a natural and indefeasible right, to worship Almighty God according to the dictates of their own consciences, and that therefore we do not propose to interfere with, or enquire into the re ligious opinions of any individual.

5th. That the people have the undoubted right peaceably to assemble, and discuss all questions of general or particular interest, and when so assembled are entitled to pro-

tection.
6th. That we have no desire to close our ports against the admission of foreigners, or to deny them an asylum from persecution in our land, with all the securities of life, liberty, and the enjoyment of property, which our constitution furnishes to our citizens, but that we do most sincerely deprecate the introduction into this country of the political or religious disputes of other lands, or the formation of associations involving foreign politics or calculated to embroil us with for eign governments.

7th. That we discountenance all distinctions between our citizens, founded upon the accident of foreign birth; that we dispise demagogues who are so studious to preserve them, and are disposed to question the fidel ity of any foreigner of what party soever he may be, who rejoices in his nativity and for gets that he is an American.

Strange Avowals.

In the New York Evening Post of the 8th in tant we find the following singular felicitations to its party upon the now almost assured succesof one of its late daring electioneering devices: "No man, in fact, can compare the electorial returns with the vote given for Wright without being convinced that his nomination kept the Democratic party together and saved the State,

which the agitators of the Texas question had nealry caused to be lost to us.
"If the effect of the nomination of Mr. Polk pparently under the auspices of those who desired the immediate annexation of Texas, in stead of Mr. Van Buren, who was proscribed because he disproved the measure, had not beer neutralized by the nomination of a Governor openly entertaining and acting upon the same ppinions with Mr. Van Buren, the State would nevitably have been lost."

article, which we take from the Sunbury American, a paper that signalized itself in the recent campaign as a warm advocate of Mr. Polk's elec-

"Mr. Polk, it is true, has not been so closely identified with the manufacturing interests as Mr. Clay, but it must be recollected that he has een sustained, and nobly sustained in this State, under many adverse circumstances, with EAGLE full confidence that he would sustain the manufacturing as well as other interests of the State according to the promise every where made by his own personal and influential friends. Polk is a man of high character and spotless integrity. He, therefore, cannot, and we think not, basely betray those who have placed their confidence in him. He will recollect that without Pennsylvania he never could have been elected. That the people of Pennsylvania are almost unanimous in favor of a tariff affording protection to their manufactories. That it was with a firm belief that he would foster their interests, as they had been assured by himself and To betray them now would be worse than Arnold's Treason. These we know to be the feelings of almost the entire democracy of this section of the State. The four counties of North umberland, Columbia, Schuylkill and Luzerne, gave him a majority of 4.681. These counties possess almost boundless wealth in their coal and iron, and are, therefore, deeply interested in the the most positive assurance that their great in-terests would be protected, and who to the man cho should attempt to betray them."

Thus commences the storm which the deception that was practiced either upon South Car tion that was practiced either upon South Car-olina or Pennsylvania, has brewed. "Wo to the man who shall attempt to betray us," says the Pennsylvania editor,—wo to Mr. Polk if he deseret us on the Tariff. "Accursed be the traitor," say the South Carolina Nullifiers, "if Mr. Polk should prove faithless to free trade-aye et him stand accursed in the calendar, if he hould not advocate the repeal of the tariff." The Locofoco leaders have sown the et them reap the whirlwind.—Balt. Patriot.

Opposition.—The New-York Tribune states that the American Republican party of that city originated with the democrats, and advises that whigs shall unite with it. We care not whom it originated. Its principles are correct and the object at which it aims is for the interes of the country; we therefore enlist under the who may be the prominent leaders of the party No such distinction as democrat or whigh recognised in the party—but on the contrary all will be blended together to achieve a common ourpose, the preservation of the country from foreign influence. The country has been lon nough agitated by the conflicts of the two old parties, and the people need repose. This will not be disturbed by the American Republicans who ask that only which is for the general bene it, and which may be g anted without setting the political elements again in commotion.

North Carolina Election.

We have received the official returns of the lection in North Carolina. The vote stands is follows: For Mr. Clay, 43,232; for Mr. Polk 33,237; majority for Clay, 3,945 .- Cin. Allas.

THE FATE OF JOHN TYLER .- The Alexan ria Gazette says
In the general noise and excitement of the mes, when every body huzzas for somebody of ther, we find one public man entirely overlooked and forgotten! Mr. John Tyler, the Acting resident of the United States, sinks before his time! Already "there are none so poor as to lo him reverence." What an end to high hopes and cherished purposes! What a fall from are lental elevation to inevitable obscurity! But here is a lesson in the result which public men night to study and remember. Mr. Tyler himself must often lament the untoward end of his political life, and feel justly indignant at the course of many who fawned and paid him by ingratitude.

EFFECTS OF THE LOCOFOCO VICTORY .- The llowing is an extract from a private letter from leading business man in Boston:

"The times already feel the influence of Polkism. Goods having fallen, and an hundred courses that were going up in Boston have been countermanded, also a number of ships, which were about to be built."

SATURDAY, NOVEMBER 30, 1844.

To our Demogratic Subscribers. We have a number of subscribers who subscribed during the Presidential canvass, and were not to pay in case Mr. Clay was not elected .-The election is over, and we give below the result, which shows that Mr. Clay is defeated. Our few democratic friends, who have gone with us during this conflict, are therefore free from payment, and this will be the last number of the REGISTER we shall send them, unless they re-

An Obsolete Idea.

The above expression, was made by Daniel Webster, perhaps in an unfortunate hour for him. But this distinguished man, may set down another idea, as entirely obsolete, different from the one, to which he applied the phrase. He may hereafter, if it is any satisfaction to him, consider the election to the Presidency, of a man of great intellectual endowments, which have been, for any length of time, employed actively in public affairs, as an "obsolete idea" indeed. We perceive from the Eastern papers, that the succession to Polk has already become a question of some interest. The Buchanans, Wrights, Cass and Bentons, as well as the Clays, Websters, Ewings, and Crittendens, to their sorrow, may as well admit that the time has passed for them, and consider themselves too big for the Presidential chair.

The Banner State

It may be considered, somewhat in bad taste for the Whigs now-adays, to talk about a " banner State." But it is nobody's business, if we make a little fuss over the State which stood strongest by the faith in the late discomfitting six days at the following rates: \$3 62½ a contest. To the Old Bay State, Kentucky had \$3 65; \$3 68 a \$3 70. Sales from wagons duas llive yield her pretensions, as to any other.

Massachusetts is the Banner Whig State. She

Massachusetts is the Banner Whig State. She

Massachusetts is the Banner Whig State. She

Massachusetts is the Banner Whig State. She has given Mr. Clay 14,000 majority, in the face of defeat; while Kentucky did not as well, though confident of victory. They have both made, the beginning of a President. But that is not the purpose; let us surrender, with a becoming grace, the banner which we won in 1840.

The Integrity of the Whig Party. Who says disband? What Whig is there,

who participated in the late unfortunate struggle, who is not still devoted to the great principles for which he then contended? What has occurred? The people have decided against our principles-The Democratic party has prevailed. The people of the United States have elected James K. Polk, President. Polk was known to be opposed to a National Bank, opposed to the distribution of the proceeds of the sales of the public lands among the States, and opposed to any modification of the veto power. On the other hand he was known to be in favor of the repeal of the tariff, and in favor of the immediate annexation of Texas to the " territory and Government" of the United States. The people have decided with him in all these things. This plain statement cannot be gainsayed. The Whig party should acquiesce without a murmur in the decision of the people for the next four years at least. True Republicanism dictates such conduct on the part of the Whigs. The Whigs, should not, during the administration of Polk, make any effort, to procure a National Bank, Distribution, or a reduction of the veto power; because the people have decided against these things. The whigs should throw no obstacle in the way of the repeal of the Tariff, or the annexation of Texas; because the people have declared in favor of both. Let the only opposition which the repeal of the Tariff may meet, come from the Northern Democracy. Let the only opposition to the Texas scheme, be found in Texas herself. The Whigs are too good republicans to oppose the will of the nation, on national questions, when clearly ascertained. But no whig should think of abandoning his principles now; defeat does not prove them wrong; they can only be proven wrong by suffering the Democracy to adopt other doctrines, and act upon other principles, which, if they work well, may show, that we need not contend, for changing their doctrines. Although we may not with propriety, in disregard of the national will, seek the administration of Polk, nevertheless, we may very properly, determine in our own minds, to do battle under our creed in the Presidential election of 1848. Let us preserve the integrity of the Whig party, giving up not one jot or tit-

noting how far they are forced to adopt Whig

principles. But do not say disband. No, never!

This new party, seems to be, becoming important, about the Northern cities. It appears to be gathering strength from all sides. We are in favor of so much of their movement as looks to a change of the naturalization laws. That may not meet with much serious opposition from any party. But a short time will probably show, how the Congress may be disposed on that subject.

Our Neighbors over the Water.

We do not mean by the above caption, our trans-Atlantic brethren, John Bull and his little progeny, but the enterprising and tasteful citizens of Covington. The improvements which are being made in that most rural little city. ndicate both a genius and enterprise worthy o omparison with cities much older and more We allude more particularly to the new City Hall, now about receiving its finishing touch, to the several substantial stores and dwelings recently erected, and the new avenues now being made.

Nor is this all; but a few months since, 'Bot any Hill.' now called "Forrest Hill," and but a short walk from the city, which was a mere mound, of monstrous size and indefinite sus-ceptibilities, is redolent with life and beauty. Under the tasteful direction of Mr. Whitley, (the same gentleman who favored our citizens vith a course of lectures on the social destiny of man,) it has rapidly advanced, in a mos promising and picturesque manner. From the new their subscription, which we hope they will strength and peculiar fitness of the fence around Mr. W.'s vineyard, we should believe him to be a strong Tariff man; at any rate, he is a most decided friend of Internal Improvements.

Mr. Kidd, too, the Architect of the City Hall

in Covington, is making himself somewhat famous on the Hill-side, by the erection of his country house and pleasure-grounds.

Mr. David Griffix has, with considerable energy, effected his share of improvement, and pened a "new and better way" to the domicils

f the dwellers on the Hill-side. We must again allude to "Forrest Hill," be cause we believe it to be the scene of an untried experiment in our sister State. Ample prepar-Mr. Polk has a small popular majority over Mr. ations are being made for an extensive yard, in which several varieties of Foreign Grapes will, under proper treatment, have a fair trial. The Steamer Isaac Shelby.

This steamer was again at our landing yesterday morning, having returned from her first trip up the Kentucky river. She went to Mundy's landing, 60 miles above Frankfort. The officers of the Louisville boats appear to have been somewhat annoyed at baving so superior a craft embark in the trade of that river, and taking time by the forelock, it had been reported that the Shelby was too long to pass through the locks, and the owners had abandoned the enterprise. Her appearance in their upper walks removed all doubts on this point. As there is but a moderate business above Frankfort during the winter months, she will only run to that point till spring. Her days of departure from Cincinnati will be Tuesday and Friday, and from Frankfort on Wednesday and Saturday. With the increase of travel in the spring an additional boat or boats, will be placed upon the line, and the route extended to a higher point .- Cin. Chron

The undersigned were present at part of the ablic examination of the pupils of Messrs. Morrison and Price, at their Academy, on Wednesday the 20th inst.

So far as we had the opportunity of judging, the pupils acquitted themselves with credit; and we have no hesitation in saying, that from the specimen we witnessed, and the moral and genlemanly character of the teachers, we consider the school well worthy of patronage. Most respectfully therefore do we call the attention of the of the Public to this Institution. We believe the above named gentlemen are determined to do, and will do, ample justice to all committed to their care.

Texas Lands.

THE subscriber has four sections of 640 acres each, in Harris County, Texas. These Lands were acquired by actual advances in cash, before the battle of the Alamo-for the necessities of the Texas Government. They are parchaent titles, signed by the President and Secretary of the State of Texas and were located for cotton Land by a special

agent. The subscriber will sell them for cash, or exchange them for City Property in Concinnati Louisville, St. Louis, and Covington, or for any good Farms in this region on fair terms. As l'exas will by present indication be annexed to he United States-the property will be worth

in time 40 to 80 dollars per acre.

The property is about 15 miles above Galves ton Bay, on Cedar Bayou, which will give a boat naviga on to the Bay and City of Garreston. The titles can be examined by any person wish ing to buy or exchange, at my house on 4th st Cincinnati. Most of the valuable lands for Cotton in Texas are already covered. Tobacco.

A Large and well finished Warehouse OR the Inspection and sales of Tobacco. has just been completed in the city of Covington, Kentucky, where there are about 25 Tobacco Manufactories, and being immediately opposite the city of Cincinnati, the very extenlive manufacturers of that place have only 15

ninutes' walk to reach said Warehouse. The undersigned, lately appointed Inspectors, under the law of the State of Kentucky, are now ready to recive for inspection, storage and sale, consignments of all kinds of Tobacco; for which there is a large and constant demand in this market.

We would particularly advise planters, to cultivate the Somerville Cigar leaf, which is in great demand; the same (if not a greater) quantity can be raised on an acre of ground, (i being planted only two feet apart and topped to from 12 to 18 leaves,) and the present sales are at double the prices of the common Ken ucky Tobacco. We feel confident the interest of all desirous of making sales in this marke will be greatly promoted.

WHEN COMSUMPTION MAY BE CLAS-SED WITH THE CURABLE DISEASES

MONG all the famous medicines for Con sumption, none seems to be meeting with greater success or obtaining a higher reputation than that most wonderful article,

WISTAR'S BALSAM OF WILD CHERRY.

That it stands at the head of other remedies now universally Conceded. It has cured thousands upon thousands-of all classes in cases of the most dangerously consumptive character. And physicians of the greatest eminenc our whole country unhesitatingly recommend it, as the

MOST POWERFUL CURATIVE Pulmonary diseases in the whole range of Pharmacy. The sales in the Western State-have so far been unparalleled; and the mosgratifying proofs of its efficacy have been received from every place were it has been used Thousands of CONSUMPTIVE PATIENTS

have already tested its exalted virtues, and con fessed its surpassing, excellent and amazing power. The remarkable success of this Balsan. no doubt owing in a great measure to the peculiarly agreeable and powerful nature of its ingredients. It is a FINE HERBAL MEDICINE,

composed chiefly of WILD CHERRY BARK and the genuine ICELAND MOSS (the latter imported expressly for this purpose,) the rare medical virtues of which are also combined by a new chemical process, with the Extract of Fin-thus rendering the whole compound the moscertain and efficacious remedy ever discovered for CONSUMPTION OF THE LUNGS. Still further evidences of the remarkable cura-

tive properties of this inestimable preparation Russelville, Brown co., O., Aug. 21, 1844. Messes, Sanford & Park--

Gentlemen: --About six weeks ago I received the agency of "WISTAR'S BALSAN OF WILD CHERRY," but with som reluc lance on my part, for the reason I had been the agent of so many pills and nostroms which wer cracked up to be something wonderful, but which lurned out in the end to be of no account what ever, except to the manufacturer. But I can tidly admit that this time I have been deceived. for the extraordinary cures effected by Wistan alsam, have convinced me that "good can come out of Nasareth." Your agent left me one lozen bottles, which are all gone—having been he means of curing several obstinate cases of Consumption—and no mistake; for what I see and know I am bound to believe. One case in particular :- A young gentleman in Winchester Adams co., O, (10 miles from this place) was corred of Consumption when the doctors had given him up, or at least could do nothing for im, and it was the intention of his friends to onvey him to your city and place him under the care of some eminent physician there. But a friend told him of Wistar's Balsam, and that be could obtain it from me. He sent for it, and before the second hottle was gone he was sound and well, and attending to his every day busi ness. As there are several inquiries for the nedicine, it would be well to forward an additional supply without delay.

Very respectfully yours,

LAMBERT NEWLAND.

The above from ! . NEWLAND, Esq., a highly espectable country merchant, commends itsel forcibly to the candid attention of all those who have doubted the great merit of Wistar's Wild Cherry Balsam.

44444444 The following we have just received from Messrs. Fall, McCracken & Co., agents for the sale of Wistar's Bulsam of Wild Cherry, at Lancas-TO THE PUBLIC.

I feel it my duty, as an act of kindness i the afflicted, to inform them what Wistar's Bal-sam of Wild Cherry has done for my daughter. There is many a parent who has given up a be-loved daughter or son, as a prey to that fell destroyer, Consumption. They have, as I have done, tried all the most skillful and eminent physicians within their knowledge, and all the most popular remedies that seem to hold out some hope for a continuance or life, without

getting any relief. To all such, who, like me, have been seeking with frembling hope for some remedy of real ef-ficacy, I would say, seek no farther, but try at once Dr. Wistar's Balsam of Wild Cherry. My daughter Sarah Jane, aged 17 years, whose life for months had been despaired of, and was sup-posed a sure prey to Consumption, has been cured! restored to perfect health and that too. by using five bottles of Dr. Wistar's Balsam of Wild Cherry. BALSAM OF WILD CRERRY. The attention of the afflicted is becoming more and more attracted to this incomparable remedy for Asthma, Bronchilis, Coughs, Consumption. &c. But it is necessary to remind all who would get the frue article, to inquire par-ticularly for Dr. Wistar's Balsam of Wild Cherry, and take nothing else. Unprincipled dealers will tell you that Syrup of Wild Cherry. or some other cough medicine is equally as good Regard them not—they only want your money. GREAT WESTERN LAND AGENCY,

No. 30, Front Street, CINCINNATI, OHIO.

The undersigned having been heretofore extensively engaged in the selling of REAL ES-TATE in the eastern cities, was induced by his numerous friends and acquaintances, to resume that branch of business in the west. He accordingly opened; temporarily, an Office, at his Lecture room, North East Corner of Main and Fifth Streets, Cincinnati, where he has been patronized for the last year, beyond his most sanguine expectations. He has now removed to Front Street, in full view of all the Steam boat arrivals and departures, where he is ready to receive propositions for the purchase and sale of Real Estate, of every variety, in Cities, Towns, or Country. His extensive and intimate acquaintance in

all the Eastern States, and in most of the large cities of the Union for the last twenty-five years, will give him very decided advantages in procuring purchasers from a distance. His Stehographic profession has given unrivalled facilities for correspondence with hundreds of editors and publishers in different parts of the United States, by which means he can more readily make known the relative merits and advantages of property brought within his agency. (As a proof of his facilities, he would remark, that on a former occasion, he sold in a single year, within a single county of Pennsylvania, farms and town lots to the amount of \$600,000-thus bringing into the pockets of his immediate neighbors, from the large cities and remote parts of the Union, cash in hand payments, to the amount of \$150,-000 within the year.)

As soon as patronage will warrant, he will, in addition to the ordinary duties of a local agent, resume his former practice of visiting the large Eastern Cities, as often as once in six months-to spread his propositions before capitalists, to exhibit and explain maps, charts and descriptions; to organize Manufacturing companies, Land Companies, Joint Stock Societies. Social Communities, etc., etc.—to receive orders. and perform such other functions, as pertain to a general land agency, between the east and the west, the north and the south, or with various countries of Europe.

In the mean time, persons wishing to sell farms, town lots, or other real estate, are respectfully invited to call at the office as above described, where the most satisfactory references will be given, and abundant evidence shown of the numerous facilities which this establishment will possess, over every and all others, in the east or

The town of Lagrange is pleasantly situated in a high and healthy part of the State, distant 25 miles from Louisville, 14 from Shelby A Fishian ville, and 8 miles from the Ohio River. Taking Alphonzo Tatt into view the healthiness of the location, and John T Brooke the chemp rate of tuition, boarding, &c., it is Nelson Norris believed that but few institutions of the kind in David Gwynn the country, offer greater, inducements to parents and guardians than "Funk Seminary;" and it is hoped that an early and liberal patronage John Sharp will be extended to it. LICKING VALLEY REGISTER.

FOURTH VOLUME, BNLARGED, WITHOUT INCREASE OF PRICE. Published weekly, in the City of Covington, Kenton County, Kentucky. The Licking Valley Register, will be con-

tinued on the same general principles by which It has heretofore been governed. Becoming more familiar with the people of Kentucky, and better acquainted with their local policy, and general interests, we shall take a still more active part in public affairs. We intend to give the proceedings of the State Legislature, and of Congress, in an extensive summary form; also Intelligence of a general character, Foreign and Domestic.

Kentucky being an agricultural State, goodly portion of the REGISTER shall be allotted to the immediate interests of the Farmer, in the selection of such articles for publication as are directly adapted to our soil, climate, and agricultural pursuits. Information of this kind, at a suitable season of the year, is, to the husbandman matter of vast importonce, and should be regarded as worthy of consideration.

The columns of the REGISTER will be open to an honest discussion of political principles whether Whig or Democratic. Whilst we arow Whig doctrines, we shall abuse no party for difwith us in opinion-the right of opinion should be held sacred to all.

We need not urge upon people of commo intelligence, the public utility and importance of a well conducted newspaper. Its advantages are too apparent. No town, village or city, can ever rise into note without this necessary appendage, to give it character and consequence. The property of every man owning real estate in town, is increased in value more than double the amount of subscription, by the publication of a good NEWS PAPER. It invites immigration: people at a distance are able to form an opinion of the advantages our location form an opinion of the advantages our location present to the enterprising merchant, manufacturer, professional or business man. These things are sought for by persons at a distance more than by those among us, and they can never, arrive at a thorough knowledge of our true position, in any other way than through the medium of the Press, and without which a city can have no legitimate claim to respectable. can have no legitimate claim to respectable standing among cities. It becomes, therefore, a matter of duty, for every honest man to give it his hearty support; it is, in fact, an evidence of a lack of intelligence, or want of taste for knowledge, for a man not to take a newspaper, he appears willing to remain in ignorance of those very things which most deeply concern his best interests. Look to the families of those who subscribe for a paper, their children are intelligent, they have a general knowledge of passing events, and the history of the times, that others do not possess.

In fine, the REGISTER will be made a useful FAMILY PAPER, useful to the husbandman and to the mechanic, and a welcome visiter to the Ludies' Parlor. The Literary department will be blended with moral and instructive tales, essays, &c. With this brief exposition of our course we ask for public patronage.

RICHARD C. LANGDON.

WILLIAM C. MUNGER.

TERMS .-- The LICKING VALLEY REGISTER will be publised at the low price of TWO DOLLAR's a year payable in advance, or within six months: after which TWO DOLLAR'S AND FIFTY CENTS will invariably be charged.

Farmers residing in the country, who find it difficult to raise money, can pay in pro-duce at the market price. Wheat, Corn, Tobacco. Beeswix, Tallow, Bacon, Hemp, Wood, &c. will be received if delivered at some point which shall be agreed upon.

DOCTOR J. BENNETT'S ANTI-BILLIOUS PILLS.

TO We the constant and increasing demand for DR, BENNETP'S ANTI-BILLIOUS PILLS, (a remedy which he has used in extensive practice for upwards of twenty years,) the subscribers have been induced to offer the this way, not as a catch-penny nostrum, but as the best purgative preparation in the whole range

of the Materia Medica.

If it was deemed necessary for the purpose of bringing these pills into more general use, numerous certificates of Physicians, and others o the most respectable citizens of the City and surrounding country, could at any moment be obtained, attesting their great superiority over most of the purgative preparations in common

use.
These Pills are mild, though effectual in their They act upon the secretions of the Liver

Kilneys and Skin. They are allerative in their tendency, purifying the Blant, and correcting those morbid conditions of the system, which if not arrested, of ten terninates in serious disease.

They are speedy in their effect, and in cases

where the bowels require immediate evacuation, may be relied on with the greatest certainty. DIRE TIONS: -As a mild purgative in Dy pensia, or in habitual costiveness, take one pill o

going to bed, and if it produces no effect, take another before breakfast the following morning and so on. For a moderately active purge, take one every

hour, until the howels are moved.
For an active and speedy effect, take 4 pills at For children, pulverize a pill or two, and give in proportion to their age, in small portions every

hour till they operate. Prepared by BENNETT, PRETLOW & CO., Corner Scott street and Market Space, Covington, Kentucky

highest esteem for its healing properties in all diseases of the Lungs, cannot but render this preperation for superior to any hitherto offered le the notice of the public. It has already gained the confidence of the afflicted wherever it has been used, and the distinguished name at the head of this notice is a sufficient guarantee that the Compound is one of the highest value. It has received the sauction of many of the most enlightened Physicians of the age, and is in evey sense an entirely scientific preparation.

The Syrup is not given to the public as a remedv in all diseases incident to humanity, but for Coughs and Colds, (so often the forerunners of fatal Consumption,) in the forming stages, it is specific, with hul moderate attention to diet and exposure on the part of the patient; and even in the most hopeless cases offentimes affording unlooked for relief.

The proprietors deem it unnecessary to say much nore, or append long lists of certificates to this notice, as it is presumed that every one will wish to experience for himself; they, therefore, with the greatest confidence, recommend the afflicted to give it a faithful trial.

DARLINGTON, Beaver Co., Feb. 1842. Dear Sir: I feel it due to you, as the inven-tor of the medicine, and to the public, who may he greatly benefitted by it, to state a cure that was performed in my family, by the use of the

Carminative Balsam.

My little son, when about two months old, was seized with a bowel complaint, cansed, as I suppose, by change of diet. It continued twe weeks without intermission, and notwithstanding the remedies applied by a respectable physician, we gave up the childs victim as we supposed, to fatal disease. But I providentially heard of Jayne's Carminative and immediately dispatched a messerger to a town 17 miles off, for a bottle. By using this medicine in less than Carminative Balsam. for a bottle. By using this medicine in less than 36 hours the disease was effectually checked; and by a continued use of it for a few days, the child was restored to perfect health. Shortly after this, there occurred a similar case, in one of the families of my congregation; I prescribed Jayne's Carminative, and the result was a speedy cure. From the knowledge of the efficacy of your medicine in "Bowel Complaint," a disease

to which children are constantly hable, I have obtained and keep continually in the house a quantity of the Carminative.

The same child, owing to exposure, when recently coming up the Ohio, was attacked by the horrible mallady, CROUP. We landed in the night, at Beaver Point, and when our fears were alarmed, lest the hoarse, sepulchral cough, was the fore runner of death, we gave him a tea-spoon full of the Expectorant, a bottle of which you presented me with, when in Philadelphia, and applied some liniment to the throat and breast, and before many minutes the hourseto the citizens of Covington, and the far-ness of Kenton, that they have commenced the slept sweetly. Owing to these circumstances, it cannot be wondered at, that I have so highly an opinion of Dr. Jayne's medicine, and why

LAMBERTSVILLE, N. J. April 27, 1839.
DR. JAVNE: Dear Sir-By the blessing of God, your Indian Expectorant, has affected a cure in me of a most distressing complaint. In December last, I was seized with great severity, by a paroxysm of Asthma; a disease with which I had been afflicted many years past. It was attended with a hoarseness and soreness of the lungs and throat, together with a laborious cough and complete prostration of strength; and worn out with suffocation, a bottle of your Expectorant was sent to my house. At first I thought t was nothing but a quackery, but seeing it so highly recommended by Dr. Going, with whom I was well acquainted, I was induced to try it, and in a few days it completely cured me, nor have now formed so high an opinion of your medicine, that if I had but a few bottles of it, and could obtain no more, I would not part with

them for ten dollars each! Yours, most respectfully,
JOHN SEEGER,
Pastor of the Baptist Church at Lambertsville,

PHILADELPHIA, June 9, 1839. To my personal friends I would say, that I am well acquainted with David Jayne, M. D. and know him to be a respectable physician of this city, a gentleman, in whom entire confidence may be placed. I have tested, in my own case, the beneficial effects of his Carminative Balsam, and have greater confidence in it than any other medicine of the kind.
