VOLUME IV.

COVINGTON, KENTUCKY, SATURDAY, FEBRUARY 8, 1845.

Number 29.

PRINTED AND PUBLISHED BY

R. C. LANGDON & W. C. MUNGER.

TERMS.

Weekly on a Double Medium sheet, \$2 00 Fifty cents will be added to each subscription, when not paid within the year. Single numbers in wrappers 64 cents.

ADVERTISEMENTS, of 16 lines, or less, will be charged \$1 00 for the first three, and 25 cents for each subsequent insertion. Longer ones in proportion.

7 25 per cent. discount, paper included, made to yearly advertisers. The number of insertions must be marked on the advertisement, or it will be continued until ordered out, and charged accor-

Persons wishing to discontinue the paiper, must settle all arrears before it can be done, unless at the option of the Publishers.

POETICAL.

For the Register. THE SLEIGH-RIDE.

BY G. E. D. The sleight-bells are ringing, and winter, at last, Has shot from his eyrie, the cold piercing blast; All nature he's crowning with garlands of snow, Which wave as descending, unite here below: Then briskly and sprightly we'll sing the glad

As the sleigh moving lightly, glides smoothly along.

The proud horse is dancing, as onward he moves, His nostrils expanding, his eye joyous glows, His hoofs proudly prancing, the measure they beat And the bell's cheerly ringing, keep time with his

Then onward proud courser, the whip briskly cracks, The bell's music cheering—swift, swift to the track.

The sleigh although crowded, how lightly doth

dance, As on the road skipping, it leaps to the prance; It joys in excitement, its paint lightens bright, Like meteors flashing the darkness of night:— Then onward-still onward, proud courser and

sleigh,
As the whip's sharp cracking shouts, onwardaway,

What eyes are there shining, like stars upon high! What heart-cheering laughter ascends to the sky? What pleasure arising?--what music doth ring, Like that which is heard from the firstlings of They 're the heart's careless boundings which

From slieghs gaily freighted with beauty and

Hurrah for the sleighing!-dull care clear the way,
Till the shades of night driven by coming of day, Bid mirth join with pleasure, and wit with the The eyes flash the lightening which darts from

Huzza bounding coursers, sleigh, riders, and

Swift—swift to the answer, the cracking whip calls. Cincinnati, 1845.

For the Register.

SLEEP. Where art thou gone, O gentle sleep, Where dost thy habitation keep, Hast soured on high to realms above,

Where angels chaunt "Our God is love," Or hast thou dived into the deep, Where nymphs their nightly vigils keep? Where e'er thou art return again And hover o'er my couch of pain. O spread aloft thy balmy wings, And waft me to the court of Kings, Then let me revel for awhile

In royalty's majestic aisle, Then let me look into the breast. Of him who rules with diamond crest, And see if happiness is there, If sleep his downy pillows share. Then walt me to my humble home,

Where freedom sits upon its dome, Where slavish bondage freeman spurn, And wisdom from a monarch learn, That chastity and peace we find, That chastity and peace.
Alone in a contented mind,
Where sleep its mighty visit pays
And judgment rests while fancy plays.

ION. Covington, Ky.

WOODS IN WINTER. BY H. W. LONGFELLOW.

When winter winds are piercing chill, And through the white-thorn blows the gale With solemn feet I tread the hill That overbrows the lonly vale.

O'er the bare unpland, and away Through the long reach of desert woods, The embracing sunbeams chastely play, And gladdens these deep solitudes

On the gray maple's crusted bark In tender shoots the hoar frost nips; Whilst in the frozen fountain—hark!— His piercing beak the bittern dips.

Where, twisted round the barren oak, The summer vine in beauty clung, And summer winds the stillness broke-The chrystal icicle is hung.

Where, from their frozen urns, mute springs Pour out the river's gradual tide, Shrilly the skater's iron rings, And voices fill the woodland side.

Alas! how changed from the fair scene, When birds sang out the mellow lay; And winds were soft, and woods were green And the song ceased not with the day!

But still wild music is abroad. Pale, desert woods, within your crowd; And gather winds, in house accord,

Amid the vocal reeds pipe loud. Chill airs and wintry winds, my ear

Has grown familiar with your song; I hear it in the opening year— I listen, and it cheers me long.

From the St. Louis Revellie. THE PRINTER. Click, click, click, goes the type in the slick, Noting human events, as crowding thick, They daily before him arise.

The burst of joy and the wail of sorrow, The deed of wrong and the hope to-morrow, He scans with eager eyes,

The ills of this ever changing life, Like shadows flit-a teeming throng: And each page he turns is ever rife With its moan, its jest, its tear or sone He marshals its doings, condenses its hum— Wakes it again with the sound of his drum, Laughs at its freaks, lives careless and free, And merrily hails life's last "Reveille." SCLITAIRE

The repeaches of a friend should be strictly to repress its agony. ust, and not too frequent.

SELECT TALES.

From Arthur's Magazine. THE TWO MOTHERS.

"I have went With gladness at the gift of this fair child!

Lightly Margaret, step more lightly, for mery's sake! you will awake him:" were the low vorus of a young mother. She was seated at the foot of a handsome, mahogony bedstead, upon which lay her only child; his fair, young limbs wasted by sickness. She raised her face but a noment, to speak, then burried it again amid the bed-clothes. The child's sleep was troubled; his eyes were only half closed in their sickly languor. With his ever movement his mother roused herself, and gazed upon him, with a mingling of hope and fear upon her countenance. At last he awoke, tossed one little arm above his head, and feebly moaned the name of "mother." She started from her seat, and hung over him .-She kissed his burning forhead, and offered a cooling drink to his parched lips. "O! how is he Margaret will he get well?" she asked, addressing her cousin; and, at the same time, dashing aside her blinding tears, that she might scan his features more closely. The scarlet fever had taken from his skin all its delicate smoothness; his sweet lip had lost its freshness, and his deep, blue eyes had in them the straining gaze of pain. "Will he get better?" she repeated, impatiently, grasping her cousin's arm, and watching her countenance with nervous anxiety.

"I surely cannot tell, dear Julia," replied Mrs. Cushing; "he may. It is wrong for you to be so anxious and impatient. Your agitation may injure him. Come, and sit by the window with me, and leave him to the nurse." Mrs. Cushing put her arm around her waist, and drew her unwillingly to the window.

"You must not grieve, so, dear," she said, tenderly, "even if he should be taken from you, he will find better teachers in the angels than he ever could meet with here."

"Do n't speak of his dying," interrupted Mrs. Benton. "I cannot let him go! He is my only child. You have never seen death threaten your little one. You could not speak so calmly if you had."

"I might not speak calmly, it is true," returned her cousin. "Yet would I trust in the overreling Providence of God. It is now but six by death. I cannot help sorrowing, but I do not would but think as I do-if you would but be pain. willing to struggle forward with trials which await ever one her, and fix your eyes upon that better world as the place where your dreams of happiness are to be realized, then----

"Hark! did not Albert move?" exclaimed Mrs. ret," she said; "I feel your kindness, but while her little limbs were aching and sore. The doc-I see him as he is now, I cannot be comforted .- tor was sent for; in answer to the mother's anx-O!" she continued, shuddering, "to see his little lions inquiries, he replied cheerfully, that she form laid in the cold grave-I cannot listen to would soon be well. But weeks and months you. He will not die-oh! no. He will be spar. elapsed, and still that lovely infant languished ed to me yet; this is but the trial of a mother's in sickness. She became emaciated to the last love."

Mrs. Cushing looked sadly upon her young face, pale though anxious watching. She wished to sooth her, to raise in her bosom an upward hope, to point her to where she might find a balm for her wrung spirit. But her efforts seemed useless. She pressed her hand silently, then left the room as noiselessly as possible, to prepare

herself to return to her own home. Since the dangerous illness of little Albert, she had spent most of her time in her cousin's family. On reaching her own house, her heart gave a thrill of sudden happiness, as a lovely lither in her earthly pathway. Again she pressed her lips to Ella's childish forehead, and watched her dancing eyes, and sweet roguish smile. Her imagination hurried to the far future. She saw her darling, blest with all the kind graces of womanheart upon all. Whose dream of fancy is pure as a mother's? Early the next morning Mrs. sickness." Cushing was sent for by her cousin, whose child had grown worse. She obeyed the summons without hesitation. On entering the sick cham ber, she found Mrs. Benton standing by Albert's heaving broat, with a serious countenance.

a stifling sound came from the dying child .-"Save him, for God's sake! Is he dying? she in his wisdom would not have ordered this. Oh! almost screamed, as that fearful sound again how often do we harshly and bitterly dwell upon struck her car. "Oh! is he dying?" and she the troubles which are appointed us, only for our the courts of justice is too far extraordifell back into the arms of her cousin, utterly own sakes, in the tenderest love. him as I did." After he was buried, Mrs. Benton shut herself up in her own apartment, and would see no one, but her husband and Mrs. Cushing, who brought cousin's household matters. In vain Mrs. Cushing affectionately remonstrated with her upon wickedness. She represented to her the duties her little one; have you any pain darling?" she owed her family. She spoke in earnest language, of the superior happiness little Albert must enjoy where he was. She tried to convince her, that the world of spirits is not as far removed from us as we imagine; that there is a deeper and wider sympathy between heaven and earth than we dream of, in our careless moods. She told of the calm, internal happiness which a trust in the Divine Providence brings to the soul, even when it is bowed down beneath the chastening rod that smites, although it is in love .-Mrs. Cushing once took little Ella up in Mrs. Benton's room, hoping she might arouse her from her melancholy by her careless prattle. The poor child was received with a burst of passionate tears, and the mother was begged to remove her, as she only reminded her more forcibly of

the loss she had sustained. One duil, rainy morning, Mrs. Cushing had een conversing earnestly with her cousin, and trying to cheer her spirits. She soon found how useless it was, and she left her with a heavy heart, to seek Ella, that the child's gaiety might dispel her sombre feelings. Not finding her in the sitting room or parlour, she descended to the kitchen to ask the servant about her. The woman was professing her ignorance of the truant's whereabout, when the sweet, familiar laugh onths since my husband was removed from me of Ella, herself, caught her mother's ear. She went to the back door, and found her seated conforget my duties, and yield to despair. My love | tentedly on the damp bricks of the area, her shore for my child is as great as your's; yet, if God and stockings by her side, and in her lap a pet should take her to Himself, I would be far less kitten. Several playthings had been carried out wretched than you. Death is to me but a short there, and were carelessly strewed around, as passage to a land of light. It is there where my if the little owner had been there some time .sweetest hopes are garnered. Oh! Julia, if you Mrs. Cushing's heart gave a throb of a sudden

"Oh! Ella, I fear you have taken your deathcold," she exclaimed, lifting her in her arms, and feeling the chill her damp clothes gave. She hurried with her up stair, where a slight fire was kept burning. All day she watched her anxiousdegree; her white arms lost all their roundners, and there was no color in her little, thin cheek. Her once laughing eyes were sunken; and in her pain she returned them upon her mother, with the appalling, imploring look so entirely a child's It was beyond the power of the fondest mother to remove her sufferings. From the commencement of the child's illness, Mrs. Benton arousbeen so true a friend to her in her trial. The moment she made the effort, a new spirit seemed to come upon her. She was unwearied in her kindness to the little invalid; night and day she tle creature of about two years ran forward in sought to relieve and be of use to the mother .the hall to meet her. She caught her beautiful Her voice was low, and tender; she found it a treasure in her arms, and kissed her rosy cheek, relief to her feeling to smooth Ella's pillow, to while the glad, sweet laugh of infancy rang on fan her gently when a feverish glow was upon her her delighted ear. Ah! then she felt how strong cheek, and to try to ease her hard position. Ofare the ties that link our hearts to those young, ten she clasped her cousin's hand and wept sibright beings. Then more sadly she turned her Lently upon her shoulder, in that sympathy which thoughts to her cousin; with no pleasant hopes it needs not words to express. She seemed surof a future state to beguile her sorrow-bereav- prised at the calmness of Mrs. Cushing, who hovment threatening her, and nothing but despair to ered quietly around Ella's bed, the tear and meet it with. She raised her heart to heaven in smile of love often in her eye and upon her lip, gratitude that her child was spared her, to cheer but resignation was upon her smooth, pale brow. "You must have a strong hope, indeed," whispered Mrs. Benton one evening, as they sat together, watching Ella, by the dim lamp light, "to support you, while you see that sweet lamb's sufferings. Oh! Margaret, to feel and trust as did, when I saw my darling smitten down with

"I do suffer, it is true," answered Mrs. Cushing; "natural feelings and ties are strong with us both. But although I cannot always restrain bed, watching him, with a trembling lip. Occa- this trial is come upon me for good-that it is sionally she turned her eyes inquiringly upon the given by One whose mercy cannot err. The peas The child opened her eyes a moment, and gazed vacantly into her mother's face.

"She does'nt know me," said the mother, chokingly; she stooped and kissed the dying child; a fluttering breath and ther spirit fled .-"Oh, God! help me to say thy will be done!" were the low, half-breathed words that came from the mother's heart, and broke the stillness Though her fair treasure was taken from her, for a time Mrs. Cushing did not sit down in idle grief. No duties were neglected; others were not forgotten in her selfish absorbing sorrow .-Still her kind heart went forth in its sympathy and sweet charities. Her pure influence was felt by Mrs. Benton, who by degrees became possessed of her calm resignation under trial, and her ever active, useful spirit.

MISCELLANEOUS.

The Indian's Reproof.

A Shoshone warrior possesed a beautifu mare: no horse in the prairie could on speed her, and in the buffalo or bear hunt. she would enjoy the sport as much as he master, and run alongside the huge beast with great courage and spirit. Many prop ositions were made to the warrior to sell or exchange the animal but he would not hear of it. The dumb brute was his friend his sole companion, they had shared the dangers of battle and the privations of Benton, starting. She went to the bed, and ly; towards evening the color in her cheek grew of prairie traveling, why should he part looked at him a moment, then returned to her deep and severish; her sweet eyes shone with a with her? The same of that mare extended seat. "You are trying to comfort me, Marga- flashing brilliancy. She was in a high fever, and so far, that in a trip he made to San Francisco, several Mexicans offered him large sums of money; nothing however could shake him in his resolution. In those countries though horses will often be purchus ed at the low price of one dollar, it often happens that a steed well known as a good hunter or rapid pacer, will bring sums equal to those paid in England for a fine race

horse. One of the Mexicans, a wild young man resolved to obtain the mare, whether or no. One evening when the Indian was returning from some neghboring plantation, the Mexican lay down in some bushes at a short distance from the road, and moaned as if in the greatest pain. The good ed herself from her inert melancholy, to sympa- kind hearted Indian having reached the thise, in her turn, with her cousin, who had spot, heard his cries of distress, dismounted and offered any assistance: it was nearly dark :- and although he knew the sufferer to be a pale face, yet he could not distinguish his features. The Mexican begged for a drop of water, the Indian dashed into a neighboring thicket, to procure it for him. As soon as the Indian vas sufficiently distant, the Mexican vaulted upon the mare, and apostrophized the Indian:

"You fool of a redskin, not cunning enough for a Mexican, you refused my gold now I have the mare for nothing and I will make the trappers laugh, when I tell them how easily I have outwitted a Shoshone." The Indian looked at the Mexican a few moments in silence, for his heart was big, and the shameful treachery wounded him

to the very core. At last he spoke; 'Pale face,' said he, 'for the sake of others I may not kill thee. Keep the mare, the only property of a poor man, keep her ted." but never say a word how thou camest by hood-most lovely, and beloved-unselfish and you do, I would give worlds. You suffer, yet her; lest hereafter, a Shoshone having assuming, yet shedding the warmth of her sunny you do not feel that despairing, desolate grief I learned distrust, should not hearken to the voice of grief and wo. > Chinese Oath. The mode of administering an oath in

them to guide our souls from a wilderness, which on being placed at the bar, are not sworn This is the form of a Chinaman's outh.

An Anecdote of the Far West. An amusing correspondent of the New

York Tribune, writing from a town in the West, relates the following circumstance: Speaking of living reminds me of an anecdote related to me by a professor in one of our colleges. Sent here by the State for scientific purposes, he took with him as a companion a younger brother who had just graduated, and an old hunter for a guide, noon's work they pitched their encampment one day on the borders of a lake in the heart of the woods, "Come," said the professor, "let's have those peas to-day." so, while he was taking some observations

After a while the professor said he noticed an unusual chuckling between the student and the hunter. Suspecting some trickery, he sauntered quietly up towards they were making wooden spoons with on him that they had nothing but penknives to cat the peas with, and that there was a conspiracy to rob him of his share. Saying nothing, he walked to the lake shore and picking up one of those large muscle he kept around until the peas were cook ed. His presence rather obstructed their were at length ponred into the common dish, and lo! it was all soup. To prevent the possibility of the professor's getting a pens were like Virgil's "rari nartes in gurgite vasto." Imagine them at length all seated on the ground around their food each stabbing with his pen-knife at the peas, which dodged under the surface at every blow, eluding every effort to catch them. the student and hunter they whipped out their wooden spoons, and flourishing them over their heads with a loud "hurrah," made a dive at the peas. The professor coolly drew forth his huge muscle shell and ladle up the soup. The hunter and graduate stopped in utter amazement, and with months gazed at the quiet professor, who without attering a word or changing a feature, diligently plied his shell. In a few moments every pea had vanished, and the hunter as he licked his empty spoon, confessed he had been fairly out manuvered.

Circumstancial Evidence.

The Bombay Courier mentions the folowing as one of the most remarkable instances of the fallacy of circumstancial evideace on record:

"A peasant named Bhamia, an inhabi-Collectorate, having been maltreated by them before Mamlutda; a native magistrate and a day was appointed for their appearance. In the meanwhile Bhamia, meeting four Sepay's in the Company's service, was compelled to carry a portion of their baggage as far as Boonah, where he fell sick, and they were obliged to leave him behind. The friends of the missing man alarmed at his dissappearance, and knowing nothing of the cause of it, suspected that the three villagers had made way with him, and had taken them before the Mamlutda, who finding no evidence to criminate them, ordered them to be basingdoed until they should confess their guilt. To put an end to the torture they were suffering, they eventually confessed they had murdered the man, and named the first place they could think of as containing the remains of their victim, and where as fate would have it, a corpsc was actually found. They were subsequently brought to trial, when they loudly asserted their innocence, explaining the circumstances under which they had made and none for God. false confession of guilt. On examination of the words 'to pray,' and inquiring respecting it, I found all along he had misunder-which had been buried for some time, and stood me; for while I had been speaking of which bore no marks of violence upon it. the trial was postponed for some days to allow time for further inquiry. The first witness was under examination, when Bhamin himself who had returned home, made his appearance in court, and the prisoners were of course aquitted. Had not the body turned out to be that of a female, or had not the supposed dead man appeared in person, the prisoner would in all probability have been hung for an imaginary murder, their own false confession under torsince thou art dishonest enough to steal ture having been so singularly corrobora-

and bawled so loud in thine anger, that the neighbors gather around us. Alas, alas, Lieut. Fremont's Expedition to Oregon and -Asiatic Journal.

Warming Lands.

Mr. Josiah Leavitt, of Beverly, who has been remarkably successful in raising vaious kinds of vegetables, as has appeared from his superior exhibition at the Horticultural rooms, in a late number of the New England Farmer, gives his mode of warming lands, by which he gets vegetables almost as early as they are produced in the vicinity of Boston, though the season in Beverly is almost a week later, and Mr. Leavitt's land is moist and low.

His method is, to plough or spade, or in working the land in any way, to do it while the sun shines clear, and if possible, from 11 to 4 o'clock, By this means, the warm surface of the earth is turned under, the cold is brought up and warmed, buried in turn. This is repeated two or three times, on warm sunny days. Seeds planted on lands thus warmed, a week or ten days later than on lands ploughed or spaded but once, will mature their fruit earlier and of a superior size, with the same ma-

nuring and attention,
This system is founded on the true systo every person of reflection, and we doubt not may be turned to a good account. The verization of the soil, and mixing it with manure, will amply compensate for the exra ploughing.

A Chinese Entertainment.

An idea of the etiquette of a dinner par ty in china, the composition of the fete, &c. may be gathered from the following description by a correspondent of the New World, of an entertainment given by a Chinese moiety, they had cooked them so that the Merchant, at which the writer was one of

the guests: The invitation was written on thin red paper, in Chinese, and enclosed in a red envelope. When we arrived, the host received us with much ecremony placing our right hand between his hands and pressing After this process had been carried on a them closely. The host and other guests while, to the ill suppressed merriment of were dressed in a robe of rich purple silk, ornamented with cord, a cap surmounted by a gilt ball. Tea was brought to us on the verandah, and soon after we were sum moned to dinner, where we sat at small tables, at three sides, leaving the other side stick, and fitting them together, began to clear for the convenience of the waiters .-The first course consisted of a kind of soup in cups, to taste which, a flat silver ladle their spoons suspended half-way to their was used. This was followed by various other dishes, such as quail minced, bird nests, sharks' fins &c. &c., interspersed with various kinds of wine. Most of the dishes were quite liquid, and as they were eaten with shopsticks, it placed us in much the same condition as the stork who was invited to dine with the fox.

nealths it was customary to show the bottom of the cup. Three hours passed, and then beautiful flowers and fruit with another kind of tea were set before us. Afthis an excellent cup of pecco was handed tant of Ghotowlee, a village in the Tannah us, after drinking which we immediately took our leave, being attended home by a three of his fellow villagers, summoned number of lantern bearers and amid the noise of crackers and souibs.

A Deer Fight.

The Jackson Mississippian states that two negro men in Holmes county, while hunting, came upon two deer, locked torether by the horas. To all appearances they had been entangled in the morning He then determined to cross the Sierra Meand had remained so until they were disand were separated with considerable diffi-culty the negroes despatched the survivor and carried off their booty. One of them had a pair of horas with eight snags on each beam, making in all 18 points.

A Benighted race.

Whilst taking my Susoo lesson, says an African Missionary, I was surprised to find that, according to my interpreter, the Susoos have no word to express the act of 'praying,' After many repetitions 'praying,' he had understood me as 'playing. Having pointed out his mistake, and asked for the desired word, 'to pray,' he frankly 30th of June he was on the Arkansas; on told me they had no word corresponding with the 2d of July reached Bent's Fort, and on it, because the Susoos never prayed, and knew not what it was. The only religious notions which the Susoos have, are those imbibed from the Mohomedans. Their opinion is, that the Mahomedan religion tea- times. That part of the Expedition which ches black people the art of healing diseases, and of protecting from danger by means of writing charms taken from the Koran; and that the Bible teaches white people how to make money. This is the character which Europeans have carried into the interior of Africa of their religion! Need we wonder covery. that nations cannot at first believe, much less understand, the disinterested motives of missionaries in going to them, when their religion, their money, and their skin, are thus dentified.

HOW TO GROW RICH—A NEW SYSTEM: A correspondent of the Great Western Adertiser has made the following valuable contriution to the columns of that paper. The plan f growing rich is certainly original.

I'll tell you a plan for gaining wealth Better than banking, trading, or leases; Take a bank note and fold it up, And then you'll find your money in-creases!

This wonderful plan without danger or loss. Keeps your cash in your hand, where nothing can trouble it; And every time that you fold it across, 'Tis as plain as the light of the day that you double it.

Hope, Faith and Charity.

The steps which lead mankind to Heaven, In number are exactly seven: While we have Hope we must rise four, And FAITH will lead us one step more; But to attain our journey's end, True CHARITY must stand our friend.

From the Cincinnati Chronicle. California.

The recent expedition of Lieut. Fremont, under the direction of the War Department, is one of the most daring and romantic among the achievements of modern travellers. It was not merely an expedition to Oregon, but it was the crossing of the great North American Andes, in the midst of winter,-a feat far exceeding the passage of the Alps,

by the ancient or modern warriors. In the annual report of the Topographical Department there is a brief sketch of this journey. It has none of its romance, but contains an outline of what was done, which may be enough to excite an interest in the narrative, which we hope Lieutenant Fremont will hereafter give to the public. This officer left West Port, Missouri, on

the 1st of June, 1843. His route from there

was first to the mouth of the Kanzas; thence

up that stream to the Republican Fork, which was pursued to Long's Peak. This with two other lofty summits, are spurs or shoots from the gigantic range of the Rocky Mountains. Long's Peak is called from Colonel Long, now of the U. States Topographical Corps, who was at the head of the most important and advantageous exploring expedition which had visited that country since the tem of philosophy, as will appear evident day of Lewis and Clark. This peak is erroneously stated in the Topographical Report and erroneously printed in the maps, at 12, superior crops, from a more thorough pul- 500 feet in height. Its real height is 15,000 feet. This we have from Col. Long himself who surveyed it. The head of this peak, with those of its giant neighbors, rises above the regions of perpetual snow, and their frozen brows defy the melting rays of the warmest sun. Here Lt. Fremont arrived on the 4th of July. On the 14th he was at the Arkansas River, at the mouth of Fountaine qui bouit. He crossed the Mountains at the South-West Pass, and descended into the valley of the Mexican Colorado. This is one of the most remarkable spots on earth. Here, at an angle formed by a line dividing Mexico from the United States, and the head waters of the Arkansas, in the midst of the Northern Andes, are the fountain springs and branches of some of the greatest rivers in world. Not far from each other, are the head waters of the Yellow Stone, which flows into the far-rolling Missouri; the Arkansas, which joins the mighty Mississippi; Lewis's River, flowing into the Columbia, and the Colorado of Mexico, rolling its waters into the South Pacific. With barren plains on one side, vast ranges of mountains on the other, and frozen summits above, the traveller here contemplates the geographical key of the North American Continent. On the 3d of September, Lieut. Fremont

reached the great Salt Lake of Northern

Mexico, and spent a week in surveying it. On the 18th of Soptember be reached Fort Hall, and on the 26th of October, Fort Nez Perces. On the 4th of November he was at the Missionary Station of Dalles, on the Columbia. This was the Northern termination The wine was drunk from small silver of his journey on the territory of the United cups with two handles, and in drinking States. On the 26th of November he commenced the bold project of returning amidst the severities of winter. There was then a heavy fall of snow, and the thermometer was 2 degs. below zero. In the course of a few days he found himself between the river Aux Chutes and the Cascade Mountains Hor vast parallel ranges of mountains continued to run Southward, and he continued to traverse their Western base, till on the 10th of December he was at Hamatti Lake. This was probably about the 43d deg. of North latitude and 42 deg. of West longitude from Washington. This was a region of great discovery and extraordinary interest. His animals were, however, entirely worn down. and there was no prospect of getting East. rida, or great Californian Mountains, which covered. In the mean time one had killed lay between him and the Bay of San Franthe other; But still they were fast together cisco. He did so; and the cold month of Early in March he descended from icy regions to the perpetual spring of the Valley of the Sacramento. By the Mexicans he was received and treated with great hospitality .-At the end of March he proceeded up the valley of the Joaquim River, recrossing the Sierra at a very beautiful pass to the South. On the 31st of April last, he took the Spanish road from Pueblos de los Angelos to Santa Fe. Arrived again at the Colorado, he preceded North East, passed the Euta Lake and encamped at Brown's Hole, June 5th, 1844. Crossing the Colorado, he again passed the Rocky Mountains, and proceeded to the North Fork of the Nebraska. On the the 31st of July returned to the mouth of the Kanzas River.
Such is an outline of one of the longest

and most adventurous explorations of our relates to the passage of the Californian Mountains-the return to the Colorado, and the survey of that River, must have peculiar interest, and will be new to the public mind. The government deserves credit for the zezl with which it has pursued Geographical dis-

The Mechanic.

The beautiful sentence subjoined is from a play, entitled the "Carpenter of Rouen:"
"The mechanic, sir, is one of God's noblenen. What have mechanics not done? Have they not opened the chambers of the mighty deep, and extracted its treasures, and made the raging billows their highway, on which they ride as on a tame steed? Are not the elements of fire and water chained to the crank, and at the mechanic's bidding compelled to turn it? Have not mechanics opened the bowels of the earth, and made its products contribute to his wants? lightning is their plaything, and they ride triumphant on the wings of the mighty wind? To the wise they are the flood gates of knowledge, and kings and queens are decorated He who made the with their handiwork. Universe was a great Mechanic."

Affliction.-" It is good for me that I have been afflicted," may be said in many senses, but in none so truly as in a religious one. It is our own weakness that makes us seek for support; it is the sadness of earth that makes us look up to heaven.

Why was Benjamin Franklin the tvrant of the elements? Ans. Because he ruled the lightnings with a red of iron.

"I've lost flesh lately," as the butchr said when he sold a quarter of beef to a had customer.

Of the Select Committee of the Senate, appoint ed to investigate the propriety of the expendi-ture of \$76,000, in the Bank of America, &c.

In Senate, January 30, 1845. The committee appointed to investigate and report to the Senate the propriety of the expenditure of \$76,000, in the Bank of America. and to make other enquiries embraced in said resolution, beg leave to report: That they have carefully and dilligently investigated this subject -requiring each person examined before the committee, to be first sworn according to law; and after the most thorough scrutiny and examination, they are satisfied, and are unanimously of opinion, that there is nothing wrong or in proper in the expenditure of any portion of said money. It appears that \$100,000 of 5 per cent bonds were issued and sold, under the act approved March 8, 1813, entitled, "an act to amend the charters of the Banks of Kentucky,17 the proceeds of which were, by law, to be invested, under certain restrictions, in Kentucky Bank stocks the sum of \$20, 731 75 was so invested in stocks of the Bank of Louisville, and the State became the owner of 231 shares. Said investment was made at from \$88 to \$90 per share; the State being entitled to the approximating dividend on the same, which was about 3 per cent. After which investment, and delucting expenses, there was left on hand, of the proceeds of the sale of said \$100,000 of 5 per cent. bonds, the sum of \$75,518 25, to the credit of Governor Letcher in the Bank of America, in New York, with authority to John Tilford to check for the same, in case he could make the purchase of stockswho was appointed by the Governor to purchase

By an act of the Legislature, approved March 2d, 1844, for the benefit of the Contractors of the Public Works, the Governor was authorized to sell bonds to the amount of \$160,000, to enable the Board of Internal Improvement to dis-Public Contractors. By the third section of that State, not below par." And in that event, it was made the duty of the Governor to issue the same; and the Contractor receiving said bond or his claims against the State. By another act, approved on the same day, entitled, "an act supplemental to an act to provide for the pay-ment of Contractors," the Governor was directed to appropriate any unexpended balance of said \$100,000 of bonds sold, to the payment of Contractors on the Public Works, under the provisions of an act passed the present session, roviding for the payment of Contractors, and to the extent that payment shall be so made, the Governor was directed not to sell bonds as directed by the first act. The two acts, approved on the same day, and the latter being supplemental to the first, ought to be construed as one act. and the question arises, what effect the last recited act has on the first. A majority of the committee are clearly of opinion, that the last recited act did not repeal the first, and that it right to elect to receive, in discharge of their claims against the State, the bonds mentioned in the first act. The committee are of opinion, proceeds of the sale of the \$100,000 of State nds could not be invested in Bank stocks any further than had been, because the price of said stocks exceeded the limitation prescribed by said act. A majority of the committee are fur ther of opinion, that it was impracticable for the Governor to appropriate the balance of the proceeds of the sale of said bonds, under the last act, in discharge and payment of the Contractors on the public works, because the Board of Internal Improvement could not distribute, pro rala, the said sum among the Contractors, and was unwilling to pay part of the Contractors in money, and leave bonds for others; and drew upon the Governor no requisitions to pay in money, and the Governor could not pay without requisitions from the Board. They further report, that all of the Contractors who asserted established claims, elected to take their claims in the bonds aforesaid, and the requisition was drawn by the Board of Internal Improvement. a majority of the committee believe,) to the

the Contractors have asserted and established their claims during the present administration, and their claims have been discharged in bonds, committee think was very proper, and according to the provisions, spirit and meaning of said

8, 1843, entitled, "an act to, amend the charters of the Banks of Kentucky," the Governor was authorized to sell \$1,750,000 of State scrip or to invest the proceeds in the purchase of stocks in the Bonks of Kentucky, on certain conditions; the \$100,000 of 5 per cent. bonds was part of this fund, and a portion, as before stated, was inves-ted in stocks of the Bank of Louisville; and the balance, amounting to \$75,518 25, deposited in the Bank of America, in New York.

A majority of the committee are of opinion that if the proceeds of the \$100,000 of 5 per cent, bonds had been invested in stocks of the Banks of Kentucky, according to the act of March 8, 1843, the stocks, the proceeds and dividends thereof, would have been under the con-trol, and subject to the order of the Commissioners of the Sinking Fund, the Governor of Kensucky being one; and that as the Contractors on the Public Works, or all who had presented their claims, had been paid and discharged in bonds, as aforesaid, and the \$75,518 25 remaining in the Bank of America, being the proceeds of said \$100,000 of 5 per cent, bonds, and no law, after the payment of the Contractors, protransfer the same to the Commissioners of the Sinking Fund, especially as at the time of the they report that said transfer was made consulting with the Commissioners of the Sinking Fund, called together for that purpose, and ing Fund, called together for that purpose, and several legal gentlemen. And a majority think, after the payment of Contractors, said Commissioners were the legitimate holders and proprietors of said fund. The committee are further of opinion, that Governor Letcher made said transfer, as he believed, in pursuance of law. Your committe further report, that the \$75,518 25 was transferred by the check of Governor Letcher, to the Commissioners of the Sinking Fund, on the 21st June, 1844. The July interest on the January interests in 1845, were both paid lings. out of the general fund in the Bank of America, including said sum, without reference to any particular fund. The committee further states, that at the expiration of the term of office of Governor Letcher, there was on hand, with the Commissioners of the Sinking Fund, of available means, the sum of \$83,478 86.

Your committe are unhesitatingly and unanimously of opinion, that the slightest censure ought not, and cannot be attached to either the late or present Governor, or any of the authorities of the State, for the use of said money. They state that every cent of said money has been faithfully disbursed, and honestly applied in the payment and discharge of the dues of the State, and to maintain and preserve inviolate and unspotted, the faith, credit and honor of the State. They further report, that in the transfer and use of said fund, the State sustained no loss, but made a profit, by saving in interest and exchange.

They further report, that they are of opinion that the State sustained no loss in consequence of the payment of the Contractors in bonds, in-

They further report, that it has been the prac tice, in paying the interest due by the State, to anticipate the resources of the Sinking Fund, by the use of means belonging to the State; and the committee are of opinion, that in thus anticipating, the Executive has acted prudently and wisely, and to the financial advantage and in- fainting seniations so prevalent, especially a- point of the finest needle cannot be introduced speciable young butcher-

terest of the State. Governorletcher, therefore, t the time he gave the information to Governor Owsley, had the right to suppose, as he did think, that the amount of money l-ft by him, had beer mly transferred to the Bank of America, where it would be needed to pay the January instal-ment of interests, and, therefore, that the amount of the proceeds of the 5 per cent. bonds were on hand in the Bank of America, as stated by his successor, in his first special message; and change of scene towards the close of a season the committee recommend, unanimously, the

Resolved, therefore, That the unexpended resdue of the proceeds of the sale of \$100,000 of percent, bonds, amounting to the sum of \$75,- of spring, and they long for the country- its 518 25, has been faithfully, fairly and honestly athletic amusements; but they attribute their lisbursed, in the payment of Liabilities against malaise to the dampness of the weather and the State, by which there has been a saving t the State in interest and exchange.

EDUCATIONAL.

From the Ladies' Repository. Physical Education .- No. II.

BY WILLIAM WOOD, M. D.

4. The weight of the atmosphere exerts much influence in the thealthy development of physical structure. Persons predisposed to diseased lungs cannot ascend high mountains with impu nity; for, as the pressure of the air decreases. the arterior pulsations are accelerated, the capillaries are distended respiration becomes painful, and the individual, probably, either faints or is seized with pulmonary hemorrhage. The charge the indebtedness of the State to the air is too light to permit the chest to expand or to confine the blood in its proper vessel - Ele-"elect to accept as payment or part payment of his dues from the State, any of the bonds or scrip of the State, at its cash value within the State, at its cash value within the State, not below nor "And in the State, at its cash value within the heart, or chronic diseases of the lungs." And in the state, at its cash value within the heart, or chronic diseases of the lungs. matics are always affected by changes in the atmosphere in any situation, and they can a'scrip, was required to excute a written release of most invariably foretel the approach of a storm with as much certainty as a barometer. When air is very light it contains but little oxygen in a given quantity; and since this agent is essential in the support of life, neither animals nor plants flourish where there is a deficiency of it.

6. But as he pursued this most interesting study, he would know that the weight of the atmosphere is not its most important property in the growth and the health of the animal body. It must be free from foreign gasses or impure exhalations. Pure air, he would soon learn, contains twenty-one per cent. of oxygen and seventy nine of nitrogen. If these proportions are changed it becomes unhealthy. Too much did not take away from the Contractors the oxygen stimulates the lungs into unhealthy act tivity, while too little depresses all the vital powers. When the blood has gone the rounds that at the time of the passage of this act, the of the circulation, it is loaded with the wornout particles of the system, and is so far changed, both in color and composition, that it is unfit for future use until its impurities are removed. Its purification is accomplished in the ungs when, it comes in contact with the air which has been drawn into them. Its impurities, including a large quantity of carbonic acid gas, are thrown off, its original scarlet color is restored, and it is again ready to perform its part of animal economy. But if the air is impure it cannot be renovated; and consequently, it flows on a dark poisonous mass, conveying disease and death into every fibre of the sys-

6. When a given quantity of air has passed through the lungs it is deprived of a certain porning for most extensive of all the organs, and on Governor Letcher, for bonds, and the Gover- tion its vital principle, as charged with foreign nor, in strict conformity (as he believed and as gasses, and hence is unfit for immediate respiration. But the lungs are not the only part of 1844, as aforesaid, issued bonds to said Contracthe body which impairs the purity of the atmos tors, to the amount of about \$140,000, according to the requisitions of the said Board.

phere. The skin is continually throwing off an exhalation, consisting principally of carbonic exhalation, consisting principally of carbonic The committee are informed that a portion of acid gas, which mixes with the air that has already passed through the lungs, and thus renders close crowded apartments speedily perniisued according, to the provisions of this act; cious. A melancholy case illustrating this fact which exercise of power, a majority of said fell under my notice a year or two since. Four fell under my notice a year or two since. Four healthy children were put to bed for the night in a small room, and the windows and doors By the 22d section of the act approved March closed to prevent the ingress of cold air. In the morning three of them were found entirely insensible. When I reached the house one of bonds, which was retired from the Banks, and them was dead. The others are still alive; but they will never regain their health and vigor .-The parents of these children are both well educated so far as orlinary business is concerned but they had never studied the laws of animal life. Had they done so, they never would have

placed their children in a tight room, where the atmosphere must soon become poisonous. They learned too late that they had violated one of the fundamental laws of their being; and the consequence of this violation was the destruction of their offspring. 7. But the atmospheric air, may be rendered

mpure by other causes than respiration. Fires of charcoal in close rooms, frequently produce the most destructive results. The oxygen is is not only speedily exhausted, but its place supplied by carbonic acid gas-a combination viding for appropriating the same, that it was le- so poisonous to the lungs that an animal will gitimate and proper for Governor Letcher to perish in it quite as soon as it would if com pletely immersed in water. I knew an intelli transfer, he was about to retire from office; and gent and respectable mechanic, who lately fell victim to the use of charcoal in the room in which he worked. It had no chimney, and he burnt the charcoal for heating an iron, in a small furnace placed near its centre.

In cities where they burn gas the consumption foxygen is immense. A single gas burner, will consume more, and produce more foreign gas, than a doxen wax candles-hence dwelling houses lighted with it should be well ventilated-s subject worthy of coasideration among the State's indebtedness to bond holders, and those of us who are introducing rt into our dwel-

8. From a careful study of the laws of anima life, we perceive that although the houses of cities are generally provided with the means of ventilation, still there is danger, under some circumstances, of injury from inhaling vitiated air. Many of the largest dwelling houses are built in rows, with windows only in the front and rear, and these are generally closed, especially in winter, when large social parties are most frequent. At such times the rooms are crowded, from eight to twelve o'clock, [with persous of of both sexes, many of whom are dressed in such a manner as to prevent even the most partial expansion of the chest; while others, unspiration, more than their share of the common perspiration. stock of oxygen. The rooms, too, are abundant-

CONGRESSIONAL.

Annexation of Texas.

We copy below the plan of annextion adopted by the House of Representatives on the 25th It is the same offered by Mr. Foster of Tennes see, in the Senate, and by Mr. Milton Brown, of Tennessee, (both Whigs,) in the House.

Mr. Milton Brown moved to amend Weller's amendment by striking out all after the word "That," with which it commences, and insertng the following:

"Congress doth consent that the territory new State, to be called the State of Texas, with e admitted as one of the States of this Union. guaranties, to-wit:

"1. Said State to be formed, subject to the adjustment by this government of all questions of boundary that may arise with other governments, and the Constitution thereof, with the Congress for its final action, on or before the provisions for the use of his negroes." heir beloved off-pring. Few of them, however, first day of January one thousand eight hundred and forty-six.

"2. Said State, when admitted into the Unon, after ceding to the United States all public edifices, fortifications, barracks, ports and harbors, navy and navy yards, docks, magazines, arms, rmaments, and all other property and means pertaining to public defence belonging to said Republic of Texas, shall retain all the public funds, debts, taxes, and dues of every kind which may belong to or be due and owing said Republic; and shall also retain all the vacant and unappropriated lands lying within its limits, to be applied to the payment of the debts and liabilidirect; but in no event are said debts and liapilities to become a charge upon the United

"3. New States of convenient size, not exeeding four in number, in addition to said State nereafter, by the consent of said State, be formanimal and vegetable matter are undergoing ed out of the territory thereof, which shall be en spontaneous decomposition, produce many of tilled to admission under the provisions of the tract the attention of the young student in this and, by its extension throughout every cavity ion, with or without slavery, as the people of at all, even by way of profit; and the conwhich opens upon the surface, it also forms a lieach State asking admission may desire."

Mr. Douglass moved to amend the proposition from its structure it peculiarly liable to the im- of Mr. Brown, by adding thereto the following: "And in such State or States as shall be formed out of said territory north of said Missouri rant bushes, growing near the doors, by catcompromise line, slavery or involuntary servitude (except for crime) shall be prohibited."

> Mr. Milton Brown accepted this amendment, and modified his proposition by adding the same to the end thereof accordingly. The question was then put that the commit-

tee do agree to Mr. Brown's proposition as modin others it is thick and insensible, as upon the ified, and there appeared 109 in favor, and 99 againstit. The question then recurred that the House do

the cuticle, or scarf skin; the mucous, or middle agree to Mr. Weller's amendment as thus amended, that is, by striking out all after the word "That," with which it commences, and inserting Mr. Milton Brown's amendment as modified at the instance of Mr. Douglass.

And the question being put, there appeared 110 in the affirmative, 93 in the negative.

And so the proposition of Mr. Milton Brown was adopted by the Committee of the Whole on the state of the Union by a majority of 17 votes. The action above stated was in Committee of

the Whole. The committee rose and reported though this part of the skin is endowed with to the House, when the House concurred with many of the properties of organized matter, still the Committee of the Whole in adopting Mr. it is entirely colorless, and contains neither Brown's amendment, years 118, nays 101. The nerves nor blood-vessels, and of course is entireresolution as amended was then ordered to be engrossed and read a third time, yeas 119, nays The mucous cont, which lies immediately be-97. And then the resolution passed: yeas 120, hind this, is nothing but a mucous net, containnays 98. ing neither nerves nor blond vessels. It gives

filaments immediately under it. In the negro Romance in the life of a Factory Girl. it is thick and dense, while in the fair Euro-Miss Irene Nichols, daughter of Mr. nean it is frequently so attenuated that it is Nathaniel Nichols, of Monmouth, Kennebec county, while at work in a factory in Dorchester, Massachusetts, some four years ticle and rete mucosum. MISCELLANEOUS.

The Farmer of Mount Vernon.

Washington was passionately fond of agriculture. Its improvement was ever with him an object of paramount regard. Virginia can boast of few sons to whom her agriculture has been more indebted; few who as sisted in promoting her interest to a greater extent, or with the manifestation of a more ardent and patronizing zeal. The following account of his farming operations will serve to exhibit the father of his country the man first in war, first in peace, and first in the hearts of his countrymen) in his true light. "The farm of Gen. Washington at

miles. It was divided into farms of convenient size, at the distance of one, two, sion house. These farms he visited every day in pleasant weather, and was constantly engaged in making experiments for the improvement of agriculture. Some roperly included within and rightfully belonging idea of the extent of his farming opera to the Republic of Texas may be erected into a tions may be formed from the following facts. In 1787, he had five hundred acres republican form of government, to be adopted in grass, sowed six hundred bushels of oats ov the people of said Republic, by deputies in seven hundred acres with wheat, and pre Convention assembled, with the consent of the pared as much more for corn, barley, pota xisting government, in order that the same may toes, beans, peas, and one hundred and fif ty acres in turnips. His stock consisted "Sec. 2. And be it further resolved, That of one hundred and forty horses, one hunthe foregoing consent of Congress is given upon | dred and twelve cows, three hundred and the following conditions, and with the following thirty-five working oxen, heifers and steers and five hundred sheep. He constantly employed two hundred and fifty hands, and kept twenty-four ploughs going during the whole year, when the earth and weather would permit. In 1786, he slaughtered proper evidence of its adoption by the people of one hundred and fifty hogs, weighing eighsaid Republic of Texas, shall be transmitted to teen thousand five hundred and nine y the President of the U. States to be laid before pounds, for the use of his family, besides

Usefulness of Moles.

Our correspondent, says one of our exchange papers, whose communication on the utility of Moles in destroying the wireworm, and other grubs, which feed on the plants of the young corn, has furnished the following additional information on the "I had," he says, "a small field of rye-

grass and clover, one end of which, early in the spring, was like honeycomb from workings of moles. A farmer would have destroyed the workers; I, on the contrary, protected them, and not one was destroyed; but I took care to level the mould which ies of said Republic of Texas; and the residue they threw up almost every day. And now of said lands, after discharging said debts and to the practical result. I lately cut my liabilities, to be disposed of as said State may crop, which was a very good one generally; but at the end where the moles worked, the crop was better than in any other part; and now not a mole can be discovered in the field. They did the work designed to them by a wise Providence-ate up all the grubs, which would have destroyed my young of Texas, and having sufficient population, may plants, and then took their departure to some neighbor's field, where doubtless they will be trapped. Another remark, as regards birds: for example, as to the titmouse; the vulgar idea is that they destroy the Federal Constitution. And such States as may buds, and thus injure or ruin the crop.be formed out of that portion of said territory Now, I never suffer one of that kind of lying south of thirty-six degrees thirty minutes birds to be killed, but rejoice to see them, north latitude, commonly known as the Missouri and protect them; and I would rather see compromise line, shall be admitted into the Un- a superabundance of sparrows than none sequence is, that I have very frequently had a crop of fruit, when my neighbors have had none. Again, as you pass cottagegardens, you frequently see the leaves eaten off the cabbage, gooseberry and curerpillars; while cabbages in the field, and and fruit trees at a distance from houses, are flourishing and left untouched. Here again, the same cause is in opperation; the small birds, which would have destroyed the insects, are driven from the doors, but perform their natural operations at a distance from them."

There is not a little wit in the following poetical dunning epistle, although it may be as old as the Iliad, for all we know:-

SIR. To avoid all proceedings unpleasant, I beg you'll pay what is due; If you do you'll oblige me, at present; If you don't, why I'll oblige you!

What a curious thing a Printer is!-He tands while he sets, and sets when he stands; and when he wishes to set with ease he always stands erect. It is, however, the nature of the ease which makes him set while

A STEAM BALLOON. A patent has recently been obtained by J. H. Pennington for a machine to navigate the air by steam, We have before us a view of one of these machines representing ten section balloons, instead of one entire balloon, a very obvious improvement. The engine is proposed to be placed in the upper story of the car appended to the balloon, and will be of about one and a half horse power. The steerage power is a rudder or an oar connected with the bottom of the balloon.--To secure a light construction care has combine great strength with comparatively little weight .-- Cin. Gaz.

"I am in favor of immediate annexation," said a lady in Mississippi to a repudiator. "So am I!" replied he, "so let's unite," "No, no, you repudiated the Union Bonds once, and may do it again," was the sarcastic reply.

Astounding Fact. 3 PHILADELPHIA, Jan. 4, 1845.

HEREBY certify that when a man and the state of the state HEREBY certify that when I was about ears, so that in a few months I found it almost impossible to hear, unless in the very loudest tones of voice. I remained in that situation untill last summer, a period of eighteen years, when I heard of Scarpa's Compound Acoustic Oil. I immediately obtained a bottle, which I used, and am happy to say it has acted like magic, and quite cured me. Any one wishing furthur information of my case, which I think a remarkable one, will find me by calling at my residence, Concord street, first door above Sec-MRS. REBECCA BAXTER.

GREAT WESTERN LAND AGENCY.

No. 30, Front Street,

CINCINNATI, OHIO. The undersigned having been heretofore extensively engaged in the selling of REAL ES-TATE in the eastern cities, was induced by his numerous friends and acquaintances, to resume that branch of business in the west. He accordingly opened, temporarily, an Office, at his Lecture room, North East Corner of Main and Fifth Streets, Cincinnati, where he has been patronized for the last year, beyond his most sanguine expectations. He has now removed to Front Street, in full view of all the Steam boat arrivals and departures, where he is ready to receive propositions for the purchase and sale of Real Estate, of every variety, in Cities, Towns, er Country. His extensive and intimate acquaintance in

all the Eastern States, and in most of the large cities of the Union for the last twenty-five years, will give him very decided advantages in procuring purchasers from a distance. His Stenographic profession has given unrivalled facilities for correspondence with hundreds of editors and publishers in different parts of the United States, by which means he can more readily make known the relative merits and advantages of property brought within his agency. (As a proof of his facilities, he would remark, that on a former occasion, he sold in a single year, within a single county of Pennsylvania, farms and town lots to the amount of \$600,000—thus bringing into the pockets of his immediate neighbors, from the large cities and remote parts of the Union, cash in hand payments, to the amount of \$150,-000 within the year.)

As soon as patronage will warrant, he will in addition to the ordinary duties of a local agent, resume his former practice of visiting the large Eastern Cities, as often as once in six months-to spread his propositions before capitalists, to exhibit and explain maps, charts and descriptions; to organize Manufacturing companies, Land Companies, Joint Stock Societies, Social Communities, etc., etc.—to receive orders, and perform such other functions, as pertain to a general land agency, between the east and the west, the north and the south, or with various countries of Europe.

In the mean time, persons wishing to sell farms, town lots, or other real estate, are respectfully invited to call at the office as above described, where the most satisfactory references will be given, and abundant evidence shown of the nufacilities which this establishment will possess, over every and all others, in the east or

All communications through the Post Office. IF POSTAGE PAID, will receive prompt attention. OFFICE HOURS FROM 9 TO 3 O'CLOCK. M. T. C. GOULD.

General Land Agent.

THE LUNGS.

CONSUMPTION and

BLEEDING AT THE LUNGS CURED, By the use of "Dr. DUNCAN'S EXPECTO-RANT REMEDY."

ISS EMELINE YEAGER, aged seven-teen years, was taken when at the age of sixteen with a slight cold, which she neglected until the LUNGS fell a prey to that seeking detroyer, CONSUMPTION, when application to physician was made, but to no effect, he considered her case a hopeless one, and prescribed but little medicine for her. In the meantime she discharged great quantities of blood, with much expectoration of thick phlegm and cough. Her bodily frame at length became reduced to a living skeleton. Her last was anxiously looked for by her friends, that her sufferings might end by the pangs of death. During the time her physician frequently called, and, as the last resource, determined to test the virtues of "Dr. DUNCAN'S EXPECTORANT REMEDY," having noticed some extraordinary cures per-formed by the medicine in similar cases. He at once obtained two bottles and administered it once obtained two bottles and administration for her. The fourth day he found some change, which gave hopes. He continued giving the medicine for eighteen days; at that time she was rendered able to be walking in her bed chamber, to the astonishment of her friends and relatives. She continued using the medicine for eight weeks, when she declared herself entirely ree from disease and pain, and now pursues her laily occupation in perfect health.

A small pamphlet accompanies this med-cine, which gives a full description of diseases, the manner of treatment, &c. &c.

COVINGTON

SATURDAY, FEBRUARY 8, 1845.

As we have a new carrier in Covington some of our subscribers will perhaps be neglected. They will please call and get their papers and let us know, that they may hereafter get them regularly.

Our Representatives at Frankfort will be coming home in a few days. The Legislature will adjourn on Monday next. We have understood they have done nothing with the judiciary bill, which is, perhaps, the most important matter they have had under consideration this session. They have agreed to give us, to further the completion of our road, only the dividends that may arise upon the shares held by the Commonwealth. We are thankful for small favors, but think they might have done a little more.

Common School Laws.

We refer to a note from Dr. Bennett, which states that a contest has been going on in the Legislature in reference to the Common School Laws. We would infer from his remark that, in his opinion, the proposition tends to the imrovement of the system of public education; but in what way he does not specify. We feel solicitous for the improvement of our Common School system, because we think a well regulated plan of Common Schools will effect more in the way of diffusing general education in this country than any thing else. The propriety, and necessity, of the object of this system is hardly a debateable matter.

As soon as we are able to see the new law should any be passed, we intend to give it a careful examination, and such a recommendation as it may admit of, though if it contains any thing conducing to the public good, the pub-Sic will perceive it, and no doubt the people are sufficiently impressed with the importance of establishing a good system of general education.

The new President

On Thursday last, about 10 o'clock in the breast, one of which had JAMES K. POLE aboard. Not one word did Mexicans. the Judge say by way of enlightening his hearwhere he will probably ascertain what the people na.

Strict Construction.

decided on the Tariff question.

The orator addressing Col. Polk, the other day in Cincinnati, said the late election had settled the doctrine of a strict construction of the Constitution; and this was the great Democratic doctrine. But it had also settled that Texas must be annexed. We wonder if he meant that Texas must be annexed by act of Congress? and that such act would be in accordance with a strict construction of the Constitution. In this act the strict constructionists will be guilty of the most latitudinous exercise of power that has ever been employed by a Congress of the United States. But this is done in the name of democracy, and, we suppose, consequently right.

General Duff Green in Texas.

This personage seems to be the universal agent and prime factotum of slavery in the U. States, especially in regard to Texas. Our readers were recently informed that the President of Texas bail revoked his acknowledgement, as Consul, on account of a charge of bribery. We find in the Louisville Journal, news from Galveston, as late as the 18th of Jan. It seems that Duff has been trying to defend himself,with the perfect nonchalance and unrivalled indifference to truth and fact, which characterizes the cause in which he is engaged.

"The papers contain a letter from Duff Green in relation to the revocation, by President Jones of his recognition as a public officer. The avowed purpose of Gen. Green, in this publication, was to contradict rumors prejudical to himself, that had been circulated concerning the cause ply to observe actual passing events, that are of his revocation. He denies having altempted conspicuous to all mankind. Gen. Santa Anna to procure the President's approval of bills by is at last confined to a very limited sphere, where he is at present at the head of a division of any improper means; but asserts that his last interview with his Excellency was to consult fatigued, are daily witnessing the desertion of him on the details of measures about which their officers and companions. The resources of there was, as he believed a concurrence of opininterview with his Excellency was to consult there was, as he believed, a concurrence of opinion between his Excellency and himself.

wit is not now necessary to explain, further than to say that their chief object was to arrest the progress of British influence on our western and north western frontier, and especially to prevent of the country between of the country between of the republic despise him, and regard him as a their getting possession of the country between of the republic despise man, and regard man as their getting possession of the country between of the republic despise man, and regard man as their getting possession of the country between of the republic despise man, and regard man as the Nucces and the Rio Grande, for the purpose day his party was before Peubla. So much for establishing there a colony of free blacks and the prospects of the tyrant. runaway negroes; experience having demonstrated that their black colony in Canada, like their abolition in Jamaica, is a failure. I have many very important facts, bearing upon this subject, which it is my purpose, in due time, to give to ty, but will inflict summary and ignominious the public."-Cin. Chronicle.

There will be an election for mayor held in

FRANKFORT, KY., 30th January, 1845.

R. C. LANGDON, Esq.: Dear Sir: This day the Senate agreed to a this date, but few acts, of a general nature, have passed. The "\$250 law," so called, is still pending in the House. A bill to abolish the circuit courts, and establish a district court system is before the House-it is thought it will not pass this session. A bill to abolish the board of internal improvement has failed in the Senate. The bill to amend the common school laws, is still before both branches of the legislature. Gen. McAfee has been its champi-

style. I presume the bill will ultimately pass. I am truly yours, J. BENNETT.

Later from Mexico. SANTA ANNA DECLARED A TRAITOR AND AN OUTLAW.

on, and has acquitted himself in a soldier-like

The Charleston Courier is indebted to Mr. Tripler, a passenger in the schr. F. A. Brown, arrived at that port, from Havana, on the 17th instant, for the following information. This news, it will be seen, is of later date than that recently received via New Orleans, and shows that the Picaynue was right in its surmises that the statement with regard to the army of Santa Anna having been routed by Gen. Paredes:

Mr. T. left Vera Cruz for Havana on the 2d instant in the Br. mial steamer Dee, which vessel reached Havana on the 7th inst. At the last accounts Santa Anna was at San Martin de Sesmoluca, about four leagues from Peubla, with a force of about 6,000 men, mostly mounted on horses, taken from the inhabitants. Gen. Paredes being in close pursuit with an army of 9,000 men, but manguvering and avoiding a conflict as a matter of policy, as Santa Anna's forces were daily decreasing on account of desertions from his ranks, while General Paredes' was rapidly acquiring strength.

The city of Mexico had been well fortified, and every precaution taken to prevent or repel an assault. The aqueducts had been opened, and the mole which surrounds the city filled with water, and there was a force of some 30,000 armed citizens prepared to desend it.

At Vera Cruz, also, fortifications were in process, and the citizens were anning. The steamorning, five steamboats came up the river amer Montezuma left Vera Cruz a short time bebreast, one of which had Janes K. Polk aboard.

That paper says, to form a correct idea of the present political movement, it is sufficient simtroops, which, by the by, being discontented and from the poor inhabitants of small villages, who can make no defence; moreover, he has no means "What these measures are," Mr. Green says, it is not now necessary to explain, further than a say that their chief object was to arrest the

> e glorious cause of the country, on the other hand, presents the most lively and animating aspect. The whole nation has declared against Santa Anna, and the valiant defenders of the laws will not only soon restore public tranquilichastisement upon the wretches who yet defend

> and support the worst of causes.
>
> On the 1st of January, General Bravo left the

lost by desertion, in a single march, more than 2,000 men, and yesterday more than 600, among them several officers, all of whom have reported themselves to the new government.

General Paredes was to leave Queretaro on resolution from the House, to adjourn on the the 1st, to unite with Generals Bravo and Al-10th of February. So the die is cast. Up to varez, who altogether would have ten thousand men to attack Santa Anna, before Puebla. Va. rious bodies of cavalry have been organized in the neighborhoods of Vera Cruz, Perote, Jalapa,

&c., &c., to intercept the flight of Santa Anna The city of Peubla is in a perfect state of de fence, and the troops appear pleased at the close proximity of the tyrant. Their commander hav ing been the first to declare openly against the infamous decree of the 29th November, has their vious to making Spring purchases, offers, for a entire confidence. He confidently asserts that short time, for CASH, the following articles at if the mad dospot attacks him, he will assuredly the rates of Discount from former prices descri-

find his grave.

The government is exerting every nerve; and The government is exerting every nerve; and from the spirit and enthusiasm with which it is Dress and Frock Coat Broadcloths 20 do do do sustained by the people, the opinion universally Fancy Cassimeres for Pantaloonobtained seems justified, that the allied forces will make Santa Anna, for once, respect the Cassinets, Jeans, &c. laws which, during his whole life, he has so vilely Rich Cashmere Vestings, Rich Mouslin de Laines, insulted. Of the success of the people we can-not doubt for one moment. The funeral knell of the tyrant has sounded, and the hour of jus-

DEDICATION.

The dedication of the new Methodist Episco pal Church in this City, will take place on Sabbath the 16th instant. The services of Revs. H. B. Bascom, C. B. Parsons, and E. W. Senon, are expected on the occasion.

MARRIED On the 30th ult. by Rev. Lewis Conner, of Boone county, Mr. JACOB M. ROBINSON, of Kenon county, to Miss Florenda Vickers, of Boone county, Ky.

That this day have united—
Both heart and hand each joy to share, Each grief or prospect blighted. May peace, content, and joy attend them, While they live and love,

May they live long, the happy pair,

And when on earth their lives shall end, May they unite above. At Hamilton, Ohio, on the 4th inst., by Rev Thomas E. Thomas, HENRY D. STOUT, edito of the Tray Times to ELIZABETH PENNINGTON.

EXTENSIVE BOOT AND SHOE MANUFACTURING ESTABLISHMENT.

ON THE EASTERN PLAN. L. Chapin & Co., BROADWAY, opposite Lower Market, Cincinnati, Ohio.

SINCE the extensive enlargement of our business the past year, it has been universally acknowledged that we have sold more boots than any other house in the city; and we have made our arrangements the present year to manufacture 2,000 cases of Boots, and pledge ourselves to sell them cheaper than they can be pur-chased in the east and delivered in this market. Our stock of Boots and Shoes for the Springtrade will be very large, which we will sell lower

than any other house in the city.

L. CHAPIN & CO.,

Broadway, opposite Lower Market, or at the

St. Philadelphia. Also by

this city, on Saturday next, the 15th inst.

eign and Domestic. Kentucky being an agricultural State, a goodly portion of the REGISTER shall be allotted to the immediate interests of the Farmer, in the selection of such articles for publication as are directly adapted to our soil, climate, and agricultural pursuits. Information of this kind, at a suitable season of the year, is, to the husbandman matter of vast importance, and should be regarded as worthy of consideration.

The columns of the REGISTER will be open to an honest discussion of political principles whether Whig or Democratic. Whilst we arow Whig doctrines, we shall abuse no party for dif-fering with us in opinion—the right of opinion should be held sacred to all.

We need not urge upon people of common intelligence, the public utility and importance of a well conducted newspaper. Its advantages are too apparent. No town, village or city, appendage, to give it character and consequence can ever rise into note without this necessary The property of every man owning real estate in town, is increased in value more than double the amount of subscription, by the pub lication of a good NEWS PAPER. It invites immigration: people at a distance are able to form an opinion of the advantages our location present to the enterprising merchant, manufactured to the enterprising merchant. turer, professional or business man. These things are sought for by persons at a distance more than by those among us, and they can never, arrive at a thorough knowledge of our true position, in any other way than through the medium of the Pres:, and without which a city can have no legitimate claim to respectable standing among cities. It becomes, therefore, standing among cities. It becomes, therefore, a matter of duty, for every honest man to give it his hearty support; it is, in fact, an evidence of a lack of intelligence, or want of taste for knowledge, for a man not to take a newspaper, he appears willing to remain in ignorance of those very things which most deeply concern his best interests. Look to the families of those the relative problems are larger than the support of the constant of the support of the suppor who subscribe for a paper, their children are intelligent, they have a general knowledge of passing events, and the history of the times, that others do not presess.

In fine, the REGISTER will be made a useful FAMILY PAPER, useful to the husbandman and to the mechanic, and a welcome visiter to the Ladies' Parlor. The Literary department will be blended with moral and instructive tales, essays, &c. With this brief exposition of our course we ask for public patronage.
RICHARD C. LANGDON. WILLIAM C. MUNGER.

DOCTOR J. BENNETT'S ANTI-BILLIOUS PILLS.

FROM the constant and increasing demand for DR. BENNETT'S ANTI-BILLIOUS PILLS, (a remedy which he has used in extensive practice for upwards of twenty years,) the subscribers have been induced to offer them in this way, not as a catch-penny nostrum, but as the best purgative preparation in the whole range of the Materia Medica.

If it was deemed necessary for the purpose of bringing these pills into more general use, numerous certificates of *Physicians*, and others of the most respectable citizens of the City and surrounding country, could at any moment be obtained, attesting their great superiority over most of the purgative preparations in con

use.
These Pills are mild, though effectual in their operation.

They act upon the secretions of the Liver

Kidneys and Skin. They are alterative in their tendency, purifying the Blood, and correcting those morbid conditions of the system, which if not arrested, often terminates in serious disease.

They are speedy in their effect, and in cases, where the bowels require immediate evacuation, may be relied on with the greatest certainty.
DIRECTIONS:—As a mild purgative in Dyspepsia, or in habitual costiveness, take one pill on going to bed, and if it produces no effect, take another before breakfast the following morning-

and so on. For a moderately active purge, take one every hour, until the bowels are moved. For an active and speedy effect, take 4 pills at

For children, pulverize a pill or two, and give in proportion to their age, in small portions every hour till they operate. Prepared by BENNETT, PRETLOW & CO.,

Oct 28. 1843. 141f DOCTOR JACKSON'S COMPOUND SY UP OF SASSAFRAS AND WILD CHERRY.—This preparation is offered to the public as a safe and certain remedy in Coughs, Colds, Bronchitis, pains in the side and chest, Whooping-cough, the cough following measles,

Combining the virtues of the Sassafras one the great purifiers of the blood, and the active principle of the Wild Cherry, long held in the highest esteem for its healing properties in all diseases of the Lungs, cannot but render this TERMS.=-The Licking Valley Registers will be publised at the low price of TWO DOLLARS a year payable in advance, or within six months; after which TWO DOLLARS AND FIFTY CENTS will invariably be heard of this notice is a sufficient quarantee that head of this notice is a sufficient quarantee that head of this notice is a sufficient guarantee that the Compound is one of the highest value. It has received the sanction of many of the most enlightened Physicians of the age, and is in every sense an entirely scientific preparation.

The Syrop is not given to the public as a remedy in all diseases incident to humanity, but for Coughs and Colds, (so often the forerunners of fatal Consumption,) in the forming stages, it is a pecific, with but moderate attention to diet and exposure on the part of the patient; and even in the most hopeless cases oftentimes affording unlooked for relief.

The proprietors deem it unnecessary to say much more, or append long lists of certificates to this notice, as it is presumed that every one will wish to experience for himself; they, therefore, with the greatest confidence, recommend the afflicted to give it a faithful trial.

Price only 50 cents per bottle.

Prepared only by BENNETT, PRETLOW, & CO. Corner of Scott st. and Market Space. COVINGTON,

A liberal discount made to Agents. Dec. 16, 1843. 21ton POOR MAN'S GOLDEN PLASTER. HIE cheapest and best strengthening Plaste ever invented; and the most sure and effectual remedy yet discovered for Rheumatism, Lumbago, Fellons, Fever Sores, White Swellings, Inflammation of the Eyes, Weakness in the back and Loins, Ague in the face, Scalds, Bruises Burns, Scrofula, Ulcers, Chilblains, &c.

It is warranted superior to all others, not only in virtue of its healing powers which are truly astonishing, but it has the advantage of adhering firmly while it allows the use of lotions to subdue inflammation without the necessity of loosening the dressing.

Persons suffering from liver complaint, pulmo-

nary diseases inflammation of the lungs, pairs in the side or breast, quincy, sore throat, &c...
will find immediate relief by the use of this plaster. In all weather, and an encounter with perfect safety.

DIRECTIONS.—Warm the plaster and apply it quickly to the place affected.—Price TEN cents.

ANGATAD ETEATO

AIR TONIC .- Every human hair is a pe fect tube, with innumerable ramifications of the arteries branching along its inner surface, Through these vessels the blood, which imparts ritality to the hair, circulates, and when from nstructions in pores of the scalp, the supply of blood and moisture is cut off, and the hair lose its gloss, becomes dry and harsh, and falls off.-Now it is obvious that unless the pores of the scalp be opened, the capillary action of the blood restored, and the scalp and dandruff proceeding from suppressed perspiration removed, baldnes must speedily ensue. Jayne's Hair Tonic will produce all these effects—nay more, it will re-clothe the bald places with vigorous and luxuriof husiness, such as Saddles, Bridles, Saddle and Traveling Bags, Martingales, Coach, Gig and ant tresses, and ensure a healthful and redundant growth of hair, as long as it is used in conformity with the printed directions which accompany each bottle, and to which are appended numerous testimonials of its efficacy, from some other most distinguished clergymen and physicians For sale at the Comb Store, No. 125 Main st.

this city.

Just opened, some entirely new patterns of Britannia Ware. The higest price always paid for old Silver. McGREW & BEGGS. for old Silver. McGRI Cincinnati, Sept. 7, 1844. AIR TONIC.—The following communication from the Rev. Professor Eaton, of Hamilton College, N. Y., in addition to hundreds of others enqually respectable should re-

move the doubts of every reasonable person of

the uniform and singular efficacy of Jayne's Hair Tonic:

HAMILTON, Feb. 18, 1840.

DR. JAYNE, Dear Sir—I cannot say that my hair is restored but I can say that it appears to be in as rapid a state of restoration as could be reasonably expected. I had not finished the in the use of the tonic from the first, and from this cause I apprehend that the effect is proba-

bly less at present than it would otherwise have I began the use of the Tonic with little or no faith that it would ever be suscessful on my head. though I felt entire confidence in your statement of what it had done to others, and I was as much surprised as astonished when I saw the head when in your office. I assure you the hair has been nearly if not quite an incu long at the time I had it cut, on the part that was nearly if thousands upon thousands—of all classes in catery of the most dangerously consumptive character. And physicians of the greatest eminence throughout our whole country unhesitatingly destitute of any when you saw me. It was however very fine though quite thick. I am flushed with the sanguine hope of final success, by the dilligent use of your tonic which (amid all the "hair humbugs" which have been advertised in with the sanguine hope of final success, by the dilligent use of your tonic which (amid all the "hair humbugs" which have been advertised in the papers.) I am constrained to believe is what it pretends to be, and "that it will make the hair grow and no mistake," at least on some hair grow and no mistake," at least on some heads.

GEO. W. EATON,

Professor in the Hamilton literary and Theo logical Seminary.

wholesate or Relate, with the most periect article in the Western country. It possesses all the advantages of any other STOVE now in use, with at least one third more oven, which is heated with perfect uniformity, in every part. There years past had so fallen out, that I had become are fives in the oven so constructed, as to carry entirely bald, and was under the necessity of

DR. JAYNE. The Hair Tonic which I obtained at your office has been of service in preventing the falling off of my hair. Indeed there renting the falling out of my nair. Indeed there is an appearance of young hair on my head.

Yours, affectionately
J. P. HALL.

WHEN CONSUMPTION MAY BE CLAS-SED WITH THE CURABLE DISEASES

MONG all the famous medicines for Consumption, none seems to be meeting with greater success or obtaining a higher reputation than that most wonderful article, WISTAR'S BALSAM OF WILD CHERRY. That it stands at the head of other remedies

now universally Conceded. It has cured recommend it, as the MOST POWERFUL CURATIVE

Thousands of . CONSUMPTIVE PATIENTS

have already tested its exalted virtues, and con-

fessed its surpassing, excellent and amazing power. The remarkable success of this Balsam is no doubt owing in a great measure to the pe-culiarly agreeable and powerful nature of its ingredients. It is a FINE HERBAL MEDICINE, composed chiefly of WILD CHERRY BARK and the genuine ICELAND MOSS (the lat-

medical virtues of which are also combined by a new chemical process, with the Extract of Fir-thus rendering the whole compound the most certain and efficacious remedy ever discovered for CONSUMPTION OF THE LUNGS.

ter imported expressly for this purpose,) the rare

Messis. Sanford & Park-Gentlemen: -- About six weeks ago I received the agency of "WISTAR'S BALSAM OF WILD CHERRY," but with some reluctance on my part, for the reason I had been the agent of so many pills and nostrums which were cracked up to be something wonderful, but which turned out in the end to be of no account whatever, except to the manufacturer. But I can-didly admit that this time I have been deceived: for the extraordinary cures effected by Wistar's.
Palsam, have convinced me that "good can come out of Nazareth." Your agent left me one dozen bottles, which are all gone—having been the means of curing several obstinate cases of Consumption—und no mistake; for what I see and know I am bound to believe. One case in particular:—A young gentleman in Winchester, Adams co., O, (10 miles from this place) was cured of Consumption when the doctors had given him up, or at least could do nothing for him, and it was the intention of his friends to convex him to your city, and place him under CASES ass'd Cot. Umbrellas at 45c.—

convey him to your city and place him under the care of some eminent physician there. But brellas, including a very large variety of all kinds, a friend told him of Wistar's Balsam, and that which will be sold as low as any manufactured in he could obtain it from me. He sent for it, and before the second bottle was gone he was sound For sale at the Umbrella Store, East Fifth st., and well, and attending to his every day business. As there are several inquiries for the medicine, it would be well to forward an addi-

tional supply without delay.

Very respectfully yours,

LAMBERT NEWLAND.

The following we have just received from Messrs.
Fall, McCracken & Co., agents for the sale of
Wistar's Bulsam of Wild Cherry, at Lancas-

TO THE PUBLIC.

I feel it my duty, as an act of kindness to the afflicted, to inform them what Wistar's Bal-sam of Wild Cherry has done for my daughter. There is many a parent who has given up a beloved daughter or son, as a prey to that fell destroyer, Consumption. They have, as I have done, tried all the most skillful and eminent physicians within their knowledge, and all the most appular remailes that seem to hold out most popular remedies that seem to hold out some hope for a continuance or life, without

some hope for a continuance or life, without getting any relief.

To all such, who, like me, have been seeking with trembling hope for some remedy of real efficacy, I would say, seek no farther, but try at once Dr. Wistar's Balsam of Wild Cherry. My daughter Sarah Jane, aged 17 years, whose life for months had been despaired of, and was supposed a sure prey to Consumption, has been cured! restored to perfect health and that too, by using five bottles of Dr. Wistar's Balsam of Wild Cherry. JONATHAN COULSON.

Greenfield tp., Fairfield co., O.,
March 15, 1844. March 15, 1844. BALSAM OF WILD CRERRY.

The attention of the afflicted is becoming more and more attracted to this incomparable remedy for Asthma, Bronchilis, Coughs, Con-sumption, &c. But it is necessary to remind all who would get the true article, to inquire particularly for Dr. Wistar's Balsam of Wild Cherry, and take nothing else. Unprincipled dealers will tell you that Syrup of Wild Cherry, AVE special agencies for the sale of Western Reserve Cheese and Butter. Kentucky, Missouri, and Virginia Tobacco. burg manufactured Nails, Glass, Cotton Yarns, of Cicionnati articles, Sogn. Gandles, Starch.
